

## Package Quantity 1 Set Disc Brake Pad Set with Product Dimensions 85 X 65 X 07 Inches and After Service Yes Ensuring Braking Performance

Our Product Introduction

for more products please visit us on heritobrake.com

### Basic Information

- Brand Name: Herito
- Model Number: ZK-10001
- Minimum Order Quantity: 100
- Price: 6
- Packaging Details: export packing
- Delivery Time: 30days
- Payment Terms: T/T
- Supply Ability: 4 million

### Product Specification

- Warranty: 12 Months
- Hardware Included: Yes
- Braking System: TKO
- Thickness: 12 Mm
- Noise Level: Low Noise
- Model: Mazda RX-8
- Product Dimensions: 8.5 X 6.5 X 0.7 Inches
- Durability: High Wear Resistance

## Product Description

### Product Description:

The Disc Brake Pad Set is an essential component for any vehicle, designed to provide superior braking performance while ensuring safety and durability. Crafted with precision and engineered using high-quality materials, this brake pad set is an excellent choice for those seeking reliability and efficiency in their braking system. One of the standout features of this product is its use of ceramic brake pad technology, which offers numerous advantages over traditional brake pads.

Ceramic brake pads are widely recognized for their ability to deliver smooth and quiet braking performance. This Disc Brake Pad Set boasts a low noise level, making it perfect for drivers who value a peaceful and comfortable driving experience. Unlike some conventional brake pads that can produce annoying squealing or grinding sounds, these ceramic brake pads operate quietly without compromising on stopping power.

The thickness of these brake pads is 12 mm, providing a substantial amount of material to ensure longevity and consistent performance. A thicker brake pad often translates to extended life and improved heat dissipation, which helps prevent brake fade during heavy or prolonged braking. This makes the Disc Brake Pad Set not only reliable but also cost-effective in the long run, as frequent replacements are minimized.

Dimensions matter when it comes to fitting brake pads perfectly, and this set measures 8.5 x 6.5 x 0.7 inches. These dimensions ensure compatibility with a wide range of vehicles, making it a versatile option for many car owners. Proper fitment is crucial for optimal braking efficiency and safety, and this product meets those requirements with precision engineering.

When it comes to customer support, this Disc Brake Pad Set stands out by offering excellent after-service support. Buyers can rest assured that any issues or concerns will be addressed promptly and professionally, enhancing the overall ownership experience. This commitment to after service reflects the confidence the manufacturer has in their product's quality and performance.

Another important aspect to consider is the product's UPC, which is 123456789012. This unique identifier helps in verifying the authenticity of the brake pads and facilitates easy tracking and inventory management for both retailers and customers. Authenticity is vital when purchasing brake components to ensure safety and the best performance standards are met.

For those in the market for the best ceramic brake pads, this Disc Brake Pad Set presents an outstanding option. Its blend of low noise operation, robust thickness, and dependable after-service makes it a top contender in the automotive parts market. Many automotive experts and enthusiasts consider it one of the best brake pad brands available today, thanks to its consistent quality and performance. In summary, the Disc Brake Pad Set combines advanced ceramic technology, optimal thickness, precise dimensions, and reliable customer service to deliver a product that enhances vehicle safety and driving comfort. Whether you are replacing worn-out brake pads or upgrading your vehicle's braking system, this product offers the peace of mind and effectiveness that drivers seek. Choosing this brake pad set means investing in the best ceramic brake pads that balance performance, durability, and quiet operation, making it a smart choice for any vehicle owner.

### Features:

Product Name: Disc Brake Pad Set

Type: Parking Brake

Easy to Install: Yes

Thickness: 12 mm

Hardware Included: Yes

Dimensions: 120mm x 50mm x 15mm

High-quality ceramic brake pad material for enhanced performance

Durable and reliable disc brake pads designed for parking brake systems

Provides excellent stopping power and reduced brake dust

### Technical Parameters:

|                    |                        |
|--------------------|------------------------|

| Warranty           | 12 Months              |

### Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is specifically designed for the Mazda RX-8, featuring the reliable TKO braking

system. Crafted with the best brake pad material, these ceramic brake pads offer an impressive friction coefficient of 0.35, ensuring consistent and powerful stopping performance in various driving conditions. Their high wear resistance guarantees durability, making them an ideal choice for drivers seeking long-lasting brake components that maintain optimal functionality over time.

These brake pads are perfect for a wide range of application occasions and scenarios. Whether you are a daily commuter navigating city traffic or an enthusiast enjoying spirited drives on winding roads, the Herito Disc Brake Pad Set delivers superior braking performance. The ceramic composition not only provides excellent stopping power but also minimizes brake dust and noise, ensuring a cleaner and quieter driving experience. This makes them especially suitable for urban driving where comfort and cleanliness are priorities.

For those involved in more demanding driving scenarios, such as highway cruising or occasional track days, the high wear resistance of these brake pads ensures they withstand intense heat and friction without compromising safety or efficiency. The product dimensions of 8.5 X 6.5 X 0.7 inches make installation straightforward with standard brake pad tools, allowing for easy replacement and maintenance.

Additionally, the Herito Disc Brake Pad Set is an excellent choice for mechanics and automotive professionals who require reliable and high-quality parts from a trusted brand originating in China. The combination of advanced ceramic brake pads and compatibility with the Mazda RX-8's TKO braking system means these pads are tailored for precision and performance. Whether upgrading your vehicle's braking system or performing routine maintenance, these brake pads provide peace of mind and enhanced control.

In summary, the Herito ZK-10001 disc brake pads are suitable for everyday driving, performance-oriented applications, and professional automotive service. Their superior ceramic brake pad composition, high friction coefficient, and durability make them the best brake pad material choice for Mazda RX-8 owners seeking reliable and efficient braking solutions.

### Customization:

Herito offers customized disc brake pads tailored to meet your specific needs. The ZK-10001 model, made in China, features a thickness of 12 mm and dimensions of 120mm x 50mm x 15mm, ensuring a perfect fit for various vehicles. Our disc brake pads are crafted from the best brake pad material, providing a friction coefficient of 0.35 for reliable and efficient braking performance. Designed for low noise operation and easy to install, these brake pads deliver both comfort and safety. Trust Herito for the best brake pad material combined with durability and superior stopping power.

### Support and Services:

Our Disc Brake Pad Set is designed to provide superior stopping power and durability for a wide range of vehicles. To ensure optimal performance and safety, please follow the installation and maintenance guidelines provided in the product manual. Installation should be carried out by a qualified technician using appropriate tools and procedures. Always replace brake pads in pairs to maintain balanced braking performance.

Regular inspection of the brake pads is recommended to monitor wear and avoid damage to the brake discs. Replace the pads when the thickness approaches the minimum specified limit.

For any technical support or service inquiries related to the Disc Brake Pad Set, please refer to the documentation included with the product or visit our official website for detailed resources and FAQs.

Using original replacement parts and adhering to the recommended maintenance schedule will help extend the life of your braking system and ensure your safety on the road.
