

Front And Rear Ceramic Brake Pad Chamfered Designed For Easy Installation And Compatibility With Multiple Vehicle Types

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Heat Resistance: Up To 500°C
- Package Contents: 4 Brake Pads
- Noise Level: Low Noise Operation
- Numberofpads: 4
- Product Dimensions: 5.5 X 5.5 X 3 Inches
- Chamfered: Yes
- Dustgeneration: Low Dust
- Certifications: ISO 9001, SAE J661

Product Description:

Introducing our premium Disc Brake Pad Set, designed to provide exceptional braking performance and reliability for your vehicle. This comprehensive set includes 4 high-quality brake pads, making it an ideal choice for both front and rear placement on your vehicle. Whether you're upgrading your existing brake system or replacing worn-out pads, this disc brake pad set ensures enhanced safety, durability, and smooth operation under various driving conditions.

Each set comes with essential accessories, including a brake pad tool, which simplifies the installation process and ensures a perfect fit every time. The inclusion of this tool makes it convenient for both professional mechanics and DIY enthusiasts to install the pads quickly and correctly, minimizing downtime and maximizing performance. Proper installation is crucial for achieving optimal brake function, and our brake pad tool guarantees just that.

The brake pads themselves are crafted from advanced ceramic materials, offering numerous benefits over traditional brake pads. Ceramic brake pads are known for their superior heat dissipation, reduced brake dust production, and quieter operation. This means you get cleaner wheels and a more comfortable driving experience without compromising braking power. Our ceramic brake pad formulation is engineered to deliver consistent stopping power, even in demanding driving scenarios, making them among the best ceramic brake pads available on the market today.

We understand how important quality and safety certifications are when it comes to brake components. That's why our Disc Brake Pad Set proudly meets stringent industry standards, holding certifications such as ISO 9001 and SAE J661. These certifications affirm that our brake pads are manufactured under rigorous quality management systems and comply with established safety and performance benchmarks. You can trust that these pads will perform reliably and meet or exceed your vehicle's braking requirements.

With a set of 4 brake pads, this product is designed to service both the front and rear brakes of most vehicles. This versatility allows you to replace all necessary pads at once, ensuring balanced braking performance across all wheels. Balanced braking is essential for vehicle stability and control, especially during emergency stops or adverse weather conditions. By equipping your vehicle with this complete brake pad set, you help maintain optimal safety and performance on every drive.

In summary, this Disc Brake Pad Set is a smart investment for anyone seeking dependable, high-performance brake components. The ceramic brake pad construction provides the best combination of longevity, quiet operation, and clean braking. The included brake pad tool facilitates easy installation, while the comprehensive package of 4 pads covers front and rear applications. Backed by ISO 9001 and SAE J661 certifications, you can have confidence in the quality and safety of this brake pad set.

Upgrade your vehicle's braking system today with our Disc Brake Pad Set and experience the difference that the best ceramic brake pads can make. Enjoy enhanced stopping power, reduced brake dust, and a quieter ride, all while ensuring your vehicle's braking components are compliant with top industry standards. Whether you are a professional mechanic or a car enthusiast, this brake pad set with accessories is designed to meet your needs and keep your vehicle performing at its best.

Features:

- High-quality disc-brake pads for reliable stopping power
- Good ceramic brake pads designed for durability and performance
- Ceramic brake pads with low dust generation for cleaner wheels
- Heat resistance up to 500°C to maintain braking efficiency under extreme conditions
- Set includes 4 brake pads, perfect for complete replacement
- Easy to install with standard tools, suitable for DIY enthusiasts
- Includes necessary accessories for a hassle-free installation

Technical Parameters:

Chamfered	Yes
Product Dimensions	5.5 X 5.5 X 3 Inches
Noise Level	Low Noise Operation
Dust Generation	Low Dust
Accessories	Yes
Number of Pads	4
Braking System	Akebono
Warranty	2 Years Limited
Certifications	ISO 9001, SAE J661
Package Contents	4 Brake Pads

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to provide exceptional performance and reliability in a wide range of driving occasions and scenarios. Manufactured in China with strict adherence to quality standards, this product is certified under ISO 9001 and SAE J661, ensuring it meets high safety and durability benchmarks. These brake pads utilize the Akebono braking system, known for its superior stopping power and smooth braking experience.

Ideal for everyday urban driving, the Herito ceramic brake pad set offers excellent stopping power in stop-and-go traffic, making it one of

the best ceramic brake pads available on the market. Whether you are commuting to work, running errands, or navigating busy city streets, these ceramic brake pads deliver consistent performance, reducing noise and brake dust, which enhances the overall driving experience.

For those who enjoy longer highway drives or frequent road trips, the Herito ZK-10001 brake pads ensure reliable and responsive braking under various weather conditions. The best brake pad material used in this set provides superior heat dissipation, minimizing brake fade during prolonged use and high-speed driving scenarios. This makes it an excellent choice for drivers who prioritize safety and performance during extended journeys.

In more demanding situations such as mountainous terrain or hilly environments, the Herito disc brake pads maintain optimal friction and stability. The ceramic brake pad composition helps in delivering smooth and controlled braking, which is crucial for maintaining vehicle control on steep descents or curvy roads.

Installation is hassle-free with standard tools, allowing users to replace their brake pads quickly and efficiently without needing professional assistance. Each package contains 4 brake pads, sufficient for a complete axle replacement, backed by a 2-year limited warranty that provides peace of mind with your purchase.

Overall, the Herito Disc Brake Pad Set ZK-10001 is a versatile and high-performance solution suitable for a variety of driving conditions, from daily commutes to more challenging driving environments. Its blend of the best ceramic brake pads technology and proven Akebono braking system makes it a top choice for drivers seeking durability, safety, and superior braking performance.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, proudly made in China. These disc brake pads feature low dust generation and include 4 pads per set, designed for both front and rear placement on your vehicle. Crafted with ceramic infused friction material, they provide superior performance and durability. As the best brake pad brand, Herito ensures that these are among the best ceramic brake pads available on the market. Installation is easy to perform using standard tools, making it convenient for both professional mechanics and DIY enthusiasts.

Support and Services:

Our Disc Brake Pad Set is designed to provide reliable and efficient braking performance for a wide range of vehicles. To ensure optimal functionality and safety, please follow the installation instructions carefully and use the appropriate tools.

For best results, inspect the brake rotors for wear or damage before installing new brake pads. Replace or resurface the rotors if necessary to prevent uneven braking and extend the life of your brake pads.

After installation, it is recommended to perform a bedding-in procedure to properly mate the brake pads with the rotor surface. This involves a series of controlled stops from moderate speeds to gradually build up a layer of brake material on the rotor.

Regular maintenance checks are essential to monitor the condition of the brake pads and overall braking system. Replace the brake pads promptly when the friction material is worn down to the minimum thickness specified by the manufacturer.

Our support team is committed to assisting you with any technical questions or concerns regarding the Disc Brake Pad Set. Please refer to the product manual for detailed installation guidelines and safety precautions.

Using genuine replacement brake components and adhering to recommended maintenance schedules will help ensure the safety, reliability, and longevity of your braking system.
