

4 Brake Pads Disc Brake Pad Set Front And Rear Accessories Included Suitable For Passenger And Commercial Vehicles

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Package Contents: 4 Brake Pads
- Noise Level: Low Noise Operation
- Certifications: ISO 9001, SAE J661
- Heat Resistance: Up To 500°C
- Accessories: Yes
- Warranty: 2 Years Limited
- Product Dimensions: 5.5 X 5.5 X 3 Inches
- Frictionmaterial: Ceramic Infused

Product Description

Product Description:

The Disc Brake Pad Set featuring Akebono's advanced braking system is engineered to deliver exceptional performance, reliability, and safety for a wide range of vehicles. Recognized as one of the best brake pad brands in the industry, Akebono has consistently set the standard for quality and innovation in braking technology. These brake pads are specially designed with ceramic infused friction material, which provides an optimal balance of stopping power, durability, and quiet operation, making them an excellent choice for drivers seeking the best ceramic brake pads available on the market.

One of the standout features of this Disc Brake Pad Set is its impressive heat resistance capability, withstanding temperatures up to 500°C. This high heat tolerance ensures that the brake pads maintain their structural integrity and performance even under extreme braking conditions, such as aggressive driving or mountainous terrain. The ceramic infused friction material not only enhances heat dissipation but also helps to prevent brake fade, ensuring consistent and reliable braking power throughout the lifespan of the pads. In addition to superior heat resistance, these ceramic brake pads are designed to operate with remarkably low noise levels. The low noise operation is achieved through a combination of advanced material composition and precision engineering, which minimizes vibrations and reduces the typical squealing sounds associated with conventional brake pads. This feature is particularly appealing for drivers who prioritize a quiet and comfortable driving experience without compromising on safety or performance.

Durability and longevity are other key advantages of this Disc Brake Pad Set. Thanks to the ceramic infused friction material, the pads exhibit exceptional wear resistance, meaning they last longer than many traditional organic or semi-metallic brake pads. This durability translates to fewer replacements over time, providing excellent value and peace of mind to vehicle owners. Furthermore, the ceramic material generates less brake dust, keeping wheels cleaner and reducing maintenance efforts.

To back the quality and reliability of this product, the Disc Brake Pad Set comes with a 2-year limited warranty. This warranty coverage reflects the manufacturer's confidence in the product's durability and performance, providing customers with additional assurance and protection against manufacturing defects or premature wear. It underscores the commitment to delivering a high-quality product that meets or exceeds industry standards.

Choosing the best ceramic brake pads can significantly enhance your vehicle's braking performance, safety, and driving comfort. This Disc Brake Pad Set from Akebono represents the pinnacle of ceramic brake pad technology, combining cutting-edge materials, exceptional heat resistance, low noise operation, and long-lasting durability. Whether you are a daily commuter, a performance enthusiast, or someone who values safety and reliability, these ceramic brake pads from one of the best brake pad brands will meet your expectations and elevate your driving experience.

In conclusion, the Disc Brake Pad Set with Akebono's braking system and ceramic infused friction material is a top-tier choice for anyone seeking high-performance, durable, and quiet brake pads. With the ability to withstand temperatures up to 500°C, low noise operation, and backed by a 2-year limited warranty, these brake pads offer unparalleled value and peace of mind. If you want to invest in the best ceramic brake pads that deliver superior stopping power and reliability, this product is an excellent option that you can trust.

Features:

Product Name: Disc Brake Pad Set (Part Number: DBP-001)

Braking System Compatibility: Akebono

Friction Material: Ceramic Infused for superior performance

Noise Level: Low Noise Operation for a quiet driving experience

Dust Generation: Low Dust to keep wheels cleaner

Made with the best ceramic brake pads technology

Offers the best brake pad material for durability and efficiency

Designed to provide reliable and consistent braking performance

Technical Parameters:

Number of Pads	4
Accessories	Yes
Installation	Easy To Install With Standard Tools
Placement On Vehicle	Front And Rear
Heat Resistance	Up To 500°C
Part Number	DBP-001
Warranty	2 Years Limited
Friction Material	Ceramic Infused
Chamfered	Yes
Product Dimensions	5.5 X 5.5 X 3 Inches

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is expertly designed to provide superior braking performance in a variety of application occasions and scenarios. Originating from China, these disc brake pads measure 5.5 X 5.5 X 3 inches, making them a perfect fit for many vehicle types that require reliable and efficient braking components. Whether you are a daily commuter, an off-road

enthusiast, or someone who values safety during long drives, the Herito disc brake pads are engineered to meet your needs with excellence.

One of the most common application occasions for these brake pads is urban driving, where frequent stopping and starting demand brake components that maintain consistent performance without generating excessive noise. Thanks to their low noise operation feature, the Herito ZK-10001 disc brake pads ensure a quiet and comfortable driving experience, eliminating the annoying squeals often associated with inferior brake pads. This makes them an ideal choice for city vehicles and family cars that require smooth, silent braking.

For those seeking durability and enhanced performance, the Herito disc brake pad set is regarded as among the best ceramic brake pads available on the market. Ceramic pads offer superior heat dissipation, less dust generation, and longer lifespan compared to traditional metallic pads. This makes them particularly suitable for highway driving and occasional heavy braking scenarios, such as mountain descents or towing situations. The 4 brake pads included in the package ensure a full replacement set, so you can maintain optimal braking safety on both front and rear wheels.

Another scenario where these brake pads excel is during routine vehicle maintenance and upgrades. The set comes with necessary accessories and is compatible with common brake pad tools, making installation straightforward for both professional mechanics and DIY enthusiasts. The inclusion of these accessories reduces the need for additional purchases and simplifies the replacement process, saving time and effort.

Furthermore, drivers who prioritize reliability will appreciate the 2 years limited warranty offered with the Herito disc brake pad set. This warranty underscores the brand's confidence in the product's quality and durability, providing peace of mind for various driving conditions, whether in city traffic, countryside roads, or demanding terrains.

In summary, the Herito ZK-10001 disc brake pads are perfectly suited for a wide range of application occasions—from everyday urban commuting to challenging driving environments requiring the best ceramic brake pads. Their low noise operation, included accessories, and compatibility with brake pad tools make them a versatile, dependable choice for anyone looking to upgrade their vehicle's braking system with a trusted brand from China.

Customization:

Experience superior braking performance with the Herito Disc Brake Pad Set, model number ZK-10001, proudly made in China. Known as the best brake pad brand, Herito offers these high-quality pads featuring low dust generation and low noise operation for a cleaner and quieter ride. The set includes 4 brake pads with chamfered edges to ensure smooth and efficient braking. Additionally, the package comes with necessary accessories and a brake pad tool for easy installation. Choose Herito for the best ceramic brake pads that combine durability, performance, and reliability.

Support and Services:

Our Disc Brake Pad Set is designed to provide reliable and efficient braking performance for a wide range of vehicles. For optimal results, it is important to follow the installation instructions carefully and ensure that the brake pads are compatible with your specific brake system.

Before installation, inspect the brake rotors for wear or damage and replace them if necessary. Clean the caliper and mounting hardware to remove any dirt or debris that could affect the performance of the brake pads.

During installation, make sure the brake pads are properly seated and aligned within the caliper. Apply the recommended brake lubricant to the backing plates and contact points to prevent noise and ensure smooth operation.

After installation, perform a series of controlled brake applications to bed in the new pads. This process helps to transfer an even layer of friction material onto the rotors, enhancing braking efficiency and pad longevity.

Regular maintenance checks should include inspecting the brake pads for wear, monitoring braking performance, and replacing the pads when the friction material thickness reaches the manufacturer's minimum specification.

If you experience any unusual noises, vibrations, or reduced braking performance, have your brake system inspected by a qualified technician immediately to ensure safety and proper function.

Using genuine Disc Brake Pad Sets and adhering to recommended maintenance schedules will help maintain your vehicle's braking system in peak condition, ensuring safety and reliability on the road.
