

Easy To Install With Standard Tools best ceramic brake pads featuring chamfered design ensuring smooth braking and long lasting performance

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Braking System: Akebono
- Noise Level: Low Noise Operation
- Certifications: ISO 9001, SAE J661
- Numberofpads: 4
- Dustgeneration: Low Dust
- Installation: Easy To Install With Standard Tools
- Frictionmaterial: Ceramic Infused
- Heat Resistance: Up To 500°C

Product Description

Product Description:

The Disc Brake Pad Set is an essential upgrade for any vehicle owner seeking reliable and efficient braking performance. Designed to meet the highest standards, this product is certified with ISO 9001 and SAE J661, ensuring quality and safety that drivers can trust. Whether you are replacing worn-out brake pads or looking for an enhancement to your vehicle's braking system, these brake pads offer outstanding performance and durability.

One of the standout features of this Disc Brake Pad Set is its versatility in placement on the vehicle. It is suitable for both front and rear installation, making it a comprehensive solution for maintaining optimal braking power across all wheels. This means you do not need to purchase separate pads for different parts of your vehicle, simplifying the replacement process and ensuring balanced braking performance.

The package includes 4 brake pads, which is the standard requirement for a complete axle replacement. This allows for simultaneous replacement on either the front or rear wheels, promoting even wear and enhanced safety. The inclusion of all necessary pads in one package makes it a convenient and cost-effective choice for vehicle maintenance.

What truly sets this Disc Brake Pad Set apart is its integration with the Akebono braking system, a well-known and trusted name in the automotive industry. Akebono technology is synonymous with superior stopping power, reduced brake dust, and minimal noise, contributing to a cleaner and quieter driving experience. By incorporating Akebono's advanced braking system, these pads deliver smooth and consistent performance under various driving conditions.

For those searching for the best ceramic brake pads, this set represents an excellent option. Ceramic brake pads are renowned for their superior heat resistance and longevity compared to traditional organic or semi-metallic pads. They provide stable braking performance even under heavy use and high temperatures, making them ideal for both everyday driving and more demanding situations. These brake pads are engineered to offer not only excellent stopping power but also reduced wear on rotors, helping to extend the overall lifespan of your braking components.

Moreover, these good ceramic brake pads produce less dust during braking, which means your wheels will stay cleaner for longer. This is a significant advantage for car enthusiasts who want to maintain their vehicle's aesthetics without frequent cleaning. The ceramic material also contributes to quieter operation, eliminating the squealing noises often associated with inferior brake pads.

In summary, this Disc Brake Pad Set is a high-quality, reliable, and efficient choice for anyone looking to upgrade or maintain their vehicle's braking system. Certified by ISO 9001 and SAE J661, designed for front and rear placement, and equipped with four premium brake pads, this set meets and exceeds industry standards. Leveraging Akebono's advanced braking technology, it offers smooth, powerful, and quiet braking performance. If you are in the market for the best ceramic brake pads that combine durability, performance, and cleanliness, this product is an outstanding option to consider.

Features:

- Product Name: Disc Brake Pad Set
- Dimensions: 5.5 X 5.5 X 3 Inches
- Installation: Easy to install with standard tools
- Warranty: 2 years limited warranty
- Chamfered edges for reduced noise and improved performance
- Braking System: Compatible with Akebono braking systems
- Made from high-quality ceramic brake pads for superior stopping power
- Recognized as one of the best brake pad brands in the market
- Reliable disc brake pads designed for durability and safety

Technical Parameters:

Product Dimensions	5.5 X 5.5 X 3 Inches
Package Contents	4 Brake Pads
Number of Pads	4
Certifications	ISO 9001, SAE J661
Heat Resistance	Up To 500°C
Braking System	Akebono
Friction Material	Ceramic Infused
Noise Level	Low Noise Operation
Placement On Vehicle	Front And Rear
Part Number	DBP-001

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to deliver exceptional performance across a wide range of application occasions and scenarios. Manufactured in China and certified with ISO 9001 and SAE J661 standards, this brake pad set is engineered to meet the highest quality and safety requirements. Whether you are a daily commuter, a weekend adventurer, or a professional driver, these brake pads offer reliable stopping power and durability.

One of the standout features of the Herito brake pads is their low noise operation, making them ideal for urban driving and environments where noise reduction is essential. This makes the product perfect for city driving, where frequent braking is common, and a quiet ride enhances the overall driving experience. Additionally, the pads' heat resistance of up to 500°C ensures optimal performance even under extreme conditions such as mountain driving, towing, or spirited driving on winding roads.

The Herito Disc Brake Pad Set is an excellent choice for various vehicles, including passenger cars, SUVs, and light trucks. Its easy installation with standard tools means that both professional mechanics and DIY enthusiasts can fit the brake pads quickly and efficiently, minimizing downtime and maintenance costs. This ease of installation, combined with a 2-year limited warranty, provides peace of mind and long-term reliability.

When it comes to selecting the best brake pad material, Herito stands out as the best brake pad brand that balances performance, safety, and longevity. The materials used in these pads are carefully selected to provide consistent braking performance, reduced wear, and minimal dust generation. This makes the Herito brake pads not only effective but also environmentally friendly and convenient for everyday use.

In summary, the Herito Disc Brake Pad Set ZK-10001 is suitable for a variety of scenarios including daily commuting, highway driving, off-road adventures, and heavy-duty applications. Its superior build quality, certified standards, and thoughtful design make it the best brake pad material choice for drivers seeking safety, comfort, and durability.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, designed to meet your specific vehicle needs. Manufactured in China, these ceramic brake pads feature ceramic infused friction material, ensuring superior performance and durability. Suitable for placement on both the front and rear of your vehicle, these pads provide excellent heat resistance up to 500°C, making them some of the best ceramic brake pads available on the market.

With part number DBP-001, our disc brake pads come with a 2 years limited warranty, guaranteeing quality and reliability. Whether you need customization for enhanced heat resistance or specific vehicle compatibility, Herito's best ceramic brake pads can be tailored to deliver optimal braking performance and safety.

Support and Services:

Our Disc Brake Pad Set is designed to deliver superior stopping power, durability, and low noise performance for a wide range of vehicles. To ensure optimal performance and safety, please follow the installation and maintenance guidelines provided with the product. Installation should be performed by a qualified technician using appropriate tools. Always replace brake pads in pairs to maintain balanced braking performance. Before installation, inspect the brake rotors and replace or resurface them if necessary to prevent uneven wear.

During the break-in period, it is recommended to avoid aggressive braking to allow the brake pads to properly bed in with the rotors. This helps maximize braking efficiency and pad lifespan.

Regular inspection of the brake pads for wear and damage is essential. Replace the pads when the thickness reaches the manufacturer's minimum specification to ensure safety.

If you experience any unusual noises, vibrations, or decreased braking performance, discontinue use immediately and have your braking system inspected by a professional.

Our technical support team is available to assist with any questions regarding installation, compatibility, and troubleshooting to ensure you get the best performance from your Disc Brake Pad Set.
