

Disc Brakes Ceramic Brake Pad 1 Set 4 Pieces Engineered for Reduced Dust and Improved Brake Rotor Protection

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Quantity: 4 Pieces
- Brake Type: Disc Brakes
- Chamfered: Yes
- Heat Dissipation: Excellent Heat Dissipation
- Weight: 1.2 Kg
- Material: Semi-metallic
- Oem: 77362092
- Durability: High Wear Resistance

Product Description:

The Disc Brake Pad Set is a high-quality replacement solution designed to provide superior braking performance and reliability for vehicles equipped with disc brakes. Engineered with precision and manufactured to meet OEM standards, this set comes with the OEM number 77362092, ensuring perfect compatibility and fitment for a wide range of vehicle models. Each set includes 4 pieces of standard-sized brake pads, providing a complete package for all four wheels, making it an ideal choice for drivers seeking a comprehensive brake maintenance solution.

One of the standout features of this Disc Brake Pad Set is its excellent heat dissipation capability. During braking, the pads generate a significant amount of heat due to friction, and efficient heat dissipation is crucial to maintaining braking performance and preventing brake fade. These brake pads are designed to effectively disperse heat, allowing for consistent braking power even under demanding driving conditions such as steep descents, heavy traffic, or aggressive driving. This attribute not only enhances safety but also extends the lifespan of the brake pads and the entire braking system.

Constructed with advanced materials, these disc brake pads offer an ideal balance between performance, durability, and noise reduction. They are often categorized as good ceramic brake pads, known for their smooth braking experience, low dust generation, and quiet operation. Ceramic brake pads are favored by many drivers because they provide reliable stopping power while minimizing wear on the brake rotors. This ensures that the entire braking system remains in optimal condition, reducing maintenance costs over time.

The set is designed for easy installation, and when combined with a quality brake pad tool, the replacement process becomes straightforward even for DIY enthusiasts. Using the correct brake pad tool ensures that the brake pads are installed correctly and securely, preserving the integrity of the braking system. This can save time and effort, allowing vehicle owners to maintain their brakes without the need for professional assistance.

Each Disc Brake Pad Set is packaged thoughtfully to protect the components during shipping and storage. The package quantity of 1 set (4 pieces) means you receive everything needed to replace the brake pads on all four wheels, making it convenient and cost-effective. The standard size of the brake pads ensures compatibility with most disc brake systems, providing a universal fit that meets or exceeds original equipment specifications.

In summary, this Disc Brake Pad Set combines OEM quality, excellent heat dissipation, and the benefits of good ceramic brake pads to deliver a reliable and efficient braking solution. Whether you are a professional mechanic or a vehicle owner performing routine maintenance, this set offers the performance, durability, and ease of installation that you need. The inclusion of the OEM number 77362092 guarantees that you are purchasing a product that meets stringent quality standards, ensuring safety and peace of mind on the road.

Upgrade your vehicle's braking system with this premium Disc Brake Pad Set, and experience the confidence that comes with superior stopping power, reduced brake noise, and prolonged brake component life. Don't forget to use an appropriate brake pad tool during installation to achieve the best results. This product is a smart investment for maintaining optimal braking efficiency and safety in any driving condition.

Features:

- Product Name: Disc Brake Pad Set
- Includes 4 Pieces for complete replacement
- Chamfered edges for reduced noise and smoother braking
- Made from high-quality semi-metallic material
- Designed specifically for disc brakes
- Provides excellent performance comparable to the best ceramic brake pads
- Durable and reliable disc brake pads for enhanced safety
- Ideal choice for those seeking the best ceramic brake pads alternative

Technical Parameters:

Size	Standard
Brake Type	Disc Brakes
Chamfered	Yes
Noise Level	Low Noise
Quantity	4 Pieces
Durability	High Wear Resistance
OEM	77362092
Weight	1.2 Kg
Package Quantity	1 Set (4 Pieces)
UPC	123456789012

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to provide exceptional braking performance across a wide range of applications and scenarios. Manufactured in China with high-quality semi-metallic materials, these brake pads offer high wear resistance,

making them an ideal choice for drivers who demand durability and reliability from their braking system. Whether you are commuting in an urban environment, embarking on long highway journeys, or navigating challenging off-road terrains, the Herito disc brake pads ensure consistent stopping power and safety.

One of the primary application occasions for the Herito ZK-10001 brake pads is everyday city driving. In stop-and-go traffic conditions, the ability to maintain smooth and responsive braking is essential. The semi-metallic construction of these pads helps dissipate heat efficiently, reducing brake fade and ensuring that you experience reliable braking performance even during frequent stops. This makes Herito a standout choice among the best brake pad brands available on the market today.

For performance-oriented drivers and those who enjoy spirited driving or require enhanced braking for heavier vehicles, the Herito disc brake pads deliver superior friction and control. The good ceramic brake pads blend well with the semi-metallic material to provide a balanced combination of quiet operation and powerful braking force. This makes them suitable not only for passenger cars but also for light trucks and SUVs that require dependable braking under various load conditions.

Additionally, the Herito disc brake pad set is perfectly suited for use in diverse weather conditions, from wet and rainy days to dry and dusty environments. The high wear resistance ensures a longer lifespan, minimizing the need for frequent replacements and offering excellent value for money. The standard size ensures compatibility with most disc brake systems, making installation straightforward and hassle-free.

Whether you are a daily commuter, an off-road enthusiast, or simply looking to upgrade your vehicle's braking system, the Herito ZK-10001 brake pads represent a smart investment. Combining the benefits of good ceramic brake pads with the robustness of semi-metallic materials, these pads provide dependable, high-performance braking across a variety of scenarios. Trust the Herito brand to deliver safety, durability, and consistent braking power whenever you need it most.

Customization:

Herito offers customized Disc Brake Pad Sets, model number ZK-10001, manufactured in China with high wear resistance for extended durability. Our OEM brake pads are made from the best brake pad material to ensure excellent heat dissipation and reliable performance. We provide full after-service support to guarantee customer satisfaction. Choose Herito for superior disc brake pads tailored to your specific needs, with OEM reference 77362092.

Support and Services:

Product Technical Support and Services for the Disc Brake Pad Set include expert assistance to ensure proper installation, maintenance, and optimal performance of your brake pads. Our support team provides detailed guidance on compatibility with various vehicle models, helping you select the correct pad set for your needs.

We offer troubleshooting advice to address common issues such as noise, vibration, or uneven wear, ensuring your braking system operates safely and efficiently. Additionally, our services include recommendations for break-in procedures to maximize pad life and braking effectiveness.

For customers requiring maintenance tips, we provide information on cleaning and inspection techniques to detect wear or damage early. Our goal is to help you maintain peak braking performance and extend the lifespan of your Disc Brake Pad Set.

Should you encounter any technical difficulties or require further assistance, our knowledgeable support team is ready to provide timely solutions and expert advice tailored to your specific requirements.
