Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Heat Dissipation: Excellent Heat Dissipation
- Easy To Install: Yes
- Guarantee Period: 30000-50000km
- Factory No: ZK-27013
- Color: Black
- Warranty: 12 Months Manufacturer Warranty
- Productname: Disc Brake Pad Set
- Hardware Included: Yes

Product Description:

The Disc Brake Pad Set, Factory No: ZK-27013, represents a premium choice for vehicle owners seeking the best ceramic brake pads on the market. Designed with precision and crafted from high-quality materials, this brake pad set delivers superior performance, safety, and durability, making it an essential upgrade for any braking system.

Included in the package are 4 brake pads, providing a complete set for most standard disc brake systems. This ensures that all wheels receive uniform braking power, contributing to balanced and reliable stopping performance. The pads are engineered with a thickness of 0.5 inches, which not only guarantees long-lasting wear but also maintains optimal contact with the brake rotors for consistent braking effectiveness.

One of the standout features of this Disc Brake Pad Set is its ceramic infused friction material. Ceramic brake pads are widely recognized as the best ceramic brake pads available due to their ability to offer smooth and quiet braking while minimizing dust production. The ceramic infusion further enhances these properties, delivering a cleaner, quieter ride without compromising on stopping power. This makes the product ideal for drivers who prioritize both performance and comfort.

Heat dissipation is a critical factor in brake pad performance, and this set excels in that area with excellent heat dissipation capabilities. Efficient heat management helps prevent brake fade, a condition where braking power diminishes due to excessive heat buildup. By maintaining cooler operating temperatures, these brake pads ensure consistent and reliable braking performance even during prolonged or aggressive driving situations.

When it comes to safety, the Disc Brake Pad Set Factory No: ZK-27013 stands out as one of the best ceramic brake pads options. The ceramic infused friction material provides strong stopping power across a wide range of temperatures and driving conditions. Whether you're navigating city traffic, cruising the highways, or tackling hilly terrain, these brake pads deliver dependable performance that you can trust.

Additionally, the 0.5-inch thickness of each pad contributes to their longevity, reducing the frequency of replacements and offering excellent value for money. This thickness also ensures that the brake pads remain robust under heavy use, providing consistent friction and stable braking performance over time.

The ceramic infused friction material also has the advantage of generating less brake dust compared to traditional metallic or organic pads. This means your wheels stay cleaner, reducing maintenance time and effort. Moreover, ceramic brake pads are known for producing less noise, which enhances the overall driving experience by minimizing squealing or grinding sounds during braking.

In summary, the Disc Brake Pad Set Factory No: ZK-27013 is engineered to provide the best ceramic brake pads experience, combining excellent heat dissipation, durable 0.5-inch thickness, and advanced ceramic infused friction material. Whether you are upgrading your current brake system or replacing worn-out pads, this set offers superior braking performance, safety, and longevity. Choose this product to enjoy smooth, quiet, and reliable braking that meets the highest standards of quality and performance.

Features:

- Product Name: Disc Brake Pad Set
- Package Contents: 4 Brake Pads
- Installation: Easy To Install
- Product Dimensions: 8.5 X 6.5 X 0.7 Inches
- Thickness: 0.5 Inches
- Heat Dissipation: Excellent Heat Dissipation
- Made from the best brake pad material for superior performance
- Highly recommended as good ceramic brake pads for durability and efficiency
- Trusted as the best brake pad brand for reliable braking power

Technical Parameters:

Product Dimensions	8.5 X 6.5 X 0.7 Inches
Weight	Approximately 1.2 Kg Per Set
Factory No	ZK-27013
Package Contents	4 Brake Pads
Hardware Included	Yes
Friction Material	Ceramic Infused
Color	Black
Easy To Install	Yes
Installation	Easy To Install
Guarantee Period	30000-50000km

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to provide exceptional braking performance across a wide range of applications and scenarios. Manufactured in China and backed by a 12-month manufacturer warranty, these brake pads are engineered with ceramic infused friction material, making them one of the best brake pad materials available on the market. Whether you are a daily

commuter, a weekend adventurer, or a professional driver, the Herito disc brake pads are built to meet your needs with reliability and durability.

One of the most common application occasions for the Herito Disc Brake Pad Set is in everyday urban driving. Traffic jams, frequent stops, and starts require brake pads that can perform consistently without excessive wear or noise. The ceramic brake pads infused in this product ensure smooth braking with minimal dust and noise, making them ideal for city driving conditions. Their easy-to-install design means that both professional mechanics and DIY enthusiasts can replace brake pads quickly and efficiently, reducing downtime and maintenance costs.

For those who enjoy spirited driving or require enhanced performance on winding roads and highways, the Herito ceramic brake pads deliver superior stopping power and heat dissipation. This makes them perfect for scenarios where braking reliability is critical, such as mountainous terrain, long downhill stretches, or high-speed driving. The ceramic infused friction material withstands high temperatures without fading, ensuring consistent performance and safety under demanding conditions.

Additionally, the Herito Disc Brake Pad Set is suitable for light trucks, SUVs, and passenger vehicles that demand durable and reliable braking components. Their compatibility with various vehicle types makes them versatile for multiple use cases, including family trips, off-road excursions, and commercial driving. The factory number ZK-27013 ensures quality control and traceability, giving users peace of mind about the product's authenticity and performance standards.

In summary, the Herito Disc Brake Pad Set ZK-10001 is an excellent choice for anyone seeking the best ceramic brake pads on the market. Its ceramic infused friction material offers outstanding durability, low noise, and excellent stopping power. Whether you are replacing worn-out pads for routine maintenance or upgrading to the best brake pad material for enhanced safety and performance, this product is designed to meet and exceed expectations across various driving scenarios.

Customization:

Herito offers OEM brake pads customization services for the Disc Brake Pad Set, model number ZK-10001, made in China. Our disc brake pads feature a thickness of 0.5 inches and are crafted with the best brake pad material, including ceramic infused friction material, ensuring excellent performance and durability. The package contains 4 brake pads that are easy to install, providing you with good ceramic brake pads tailored to your specific requirements. Trust Herito for high-quality, reliable brake pad solutions customized to meet your needs.

Support and Services:

Our Disc Brake Pad Set is designed to provide optimal braking performance and safety for your vehicle. To ensure the longevity and effectiveness of your brake pads, regular inspection and maintenance are recommended.

When installing the brake pads, make sure to clean the caliper and rotor surfaces thoroughly to remove any dust or debris. Proper bedding-in of the brake pads is essential to achieve maximum braking efficiency; please follow the bedding procedure outlined in the product manual.

If you experience any unusual noises, vibrations, or reduced braking performance, inspect the brake pads and related components immediately. Replace the brake pads if the friction material is worn down to the minimum thickness specified.

Our technical support team is available to assist with any questions regarding installation, maintenance, or troubleshooting of the Disc Brake Pad Set. For detailed instructions and safety guidelines, please refer to the product documentation provided with your purchase. We recommend using only genuine replacement parts to maintain the integrity and safety of your braking system. Regular servicing by a qualified technician will help ensure your brake system remains in top condition.
