Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Factory No: ZK-27013
- Warranty: 12 Months Manufacturer Warranty
- Thickness: 0.5 Inches
- Guarantee Peroid: 30000-50000km
- Hardware Included: Yes
- Installation: Easy To Install
- Easy To Install: Yes
- Package Contents: 4 Brake Pads

Product Description:

The Disc Brake Pad Set is a high-quality replacement solution designed to provide superior braking performance and enhanced safety for your vehicle. Engineered with precision and crafted from premium materials, this brake pad set offers a reliable and durable option for drivers who demand excellence from their braking system. Whether you are performing routine maintenance or upgrading your current brake components, these brake pads deliver consistent stopping power and long-lasting durability.

One of the standout features of this Disc Brake Pad Set is its ceramic infused friction material. Unlike traditional brake pads, the ceramic brake pad composition ensures smoother braking with less noise and dust, making it an excellent choice for drivers who seek a cleaner and quieter ride. The ceramic infusion not only enhances the overall braking efficiency but also contributes to a longer lifespan of the pads, reducing the frequency of replacements and maintenance efforts.

Heat management is a critical aspect of brake pad performance, and this set excels in this area with its excellent heat dissipation capabilities. During intense braking situations, excessive heat can lead to brake fade, reducing the braking effectiveness and potentially compromising safety. These brake pads are designed to dissipate heat efficiently, maintaining optimal performance even under heavy use. This feature ensures that the brake pad tool required for installation works smoothly without the complications caused by overheating components.

The package includes four brake pads, providing a complete set for a full axle replacement. This comprehensive package eliminates the need for additional purchases, making it convenient and cost-effective for vehicle owners. Furthermore, hardware is included in the package, ensuring that you have all the necessary components for a straightforward installation process. This inclusion is particularly beneficial for both professional mechanics and DIY enthusiasts, as it simplifies the upgrade or replacement procedure.

Durability and reliability are paramount in brake components, and this Disc Brake Pad Set is backed by an impressive guarantee period ranging from 30,000 to 50,000 kilometers. This extended guarantee provides peace of mind, assuring you that the brake pads are built to withstand the rigors of daily driving and challenging road conditions. The confidence in the product's longevity reflects the manufacturer's commitment to quality and customer satisfaction.

Additionally, these brake pads are designed to meet or exceed the standards of OEM brake pads, meaning they are engineered to fit and perform just like the original equipment installed on your vehicle. This compatibility ensures seamless integration with your existing braking system, preserving the safety and handling characteristics intended by your vehicle's manufacturer. Choosing this Disc Brake Pad Set means you don't have to compromise on quality or performance.

In summary, the Disc Brake Pad Set offers an exceptional combination of ceramic infused friction material, excellent heat dissipation, and a comprehensive package that includes hardware and four brake pads. With a robust guarantee period of 30,000 to 50,000 kilometers and OEM brake pads compatibility, it stands out as a reliable and efficient choice for anyone looking to maintain or improve their vehicle's braking system. Whether you are a professional mechanic or a car enthusiast using a brake pad tool for installation, this ceramic brake pad set ensures enhanced stopping power, quieter operation, and longer service life, making it an ideal investment for your vehicle's safety and performance.

Features:

- Product Name: Disc Brake Pad Set
- Guarantee Period: 30000-50000km
- Package Contents: 4 Brake Pads
- Heat Dissipation: Excellent Heat Dissipation
- Color: Black
- Known as the best ceramic brake pads for reliable performance
- Offers good ceramic brake pads quality for long-lasting durability
- Designed to be some of the good ceramic brake pads available on the market

Technical Parameters:

Product Name	Disc Brake Pad Set
Package Contents	4 Brake Pads
Friction Material	Ceramic Infused
Thickness	0.5 Inches
Weight	Approximately 1.2 Kg Per Set
Brake Pad Type	Disc
Product Dimensions	8.5 X 6.5 X 0.7 Inches
Guarantee Period	30000-50000km
Installation	Easy To Install
Color	Black

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to provide outstanding braking performance for a wide range of vehicles. Originating from China and weighing approximately 1.2 Kg per set, these brake pads are engineered with precision and quality,

making them an ideal choice for drivers who prioritize safety and reliability on the road.

These good ceramic brake pads are perfect for everyday driving scenarios, including city commuting, highway cruising, and stop-and-go traffic conditions. Thanks to their ceramic formulation, they offer excellent heat dissipation, reduced brake dust, and quieter operation compared to traditional brake pads, ensuring a cleaner and more comfortable driving experience. Whether you are navigating through busy urban streets or embarking on long-distance trips, Herito's ceramic brake pad set guarantees consistent and responsive braking performance.

Installation is straightforward and user-friendly, making the Herito Disc Brake Pad Set easy to install for both professional mechanics and DIY enthusiasts. The package comes prepared with all necessary components, and the brake pads fit seamlessly into compatible disc brake systems. This ease of installation minimizes downtime and allows you to get back on the road quickly and safely.

These are among the best ceramic brake pads available in the market, combining durability with high performance. They are suitable for various vehicle types, including sedans, SUVs, and light trucks, making them versatile for different driving needs. The ceramic material used in these pads not only enhances braking efficiency but also extends the lifespan of your braking system by reducing wear and tear. Ideal for both daily use and more demanding driving conditions, the Herito Disc Brake Pad Set with factory number ZK-27013 is a reliable upgrade for anyone seeking superior stopping power and safety. Whether you are replacing worn-out pads or upgrading to a better braking solution, these ceramic brake pads will deliver the quality and performance you expect from a trusted brand. Choose Herito for the best ceramic brake pads that blend innovation, comfort, and safety in every drive.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, proudly made in China. Our ceramic brake pad sets are designed with high-quality ceramic infused friction material to ensure superior performance and durability. As the best brake pad brand in the market, we provide easy to install brake pads that come with all necessary hardware included for a hassle-free installation experience. Whether you need customization for specific vehicle requirements or factory number ZK-27013, Herito guarantees the best ceramic brake pads tailored to your needs.

Support and Services:

Our Disc Brake Pad Set is designed to provide reliable and efficient braking performance for a wide range of vehicles. Manufactured with high-quality materials, these brake pads ensure durability, reduced noise, and minimal dust for a cleaner, safer driving experience.

For optimal performance, it is recommended to have the brake pads installed by a professional technician. Proper installation and maintenance are crucial to maximize the lifespan and effectiveness of the brake pads.

If you experience any issues such as unusual noises, reduced braking efficiency, or vibrations, please consult your vehicle's manual or contact a qualified service center for inspection and assistance.

Regular maintenance checks are advised to monitor the condition of your disc brake pads and replace them when the thickness is below the manufacturer's recommended limit.

We provide comprehensive support and services to ensure customer satisfaction. Should you require further technical assistance or information about the Disc Brake Pad Set, please refer to our official website or product documentation.
