

SAE J661 Certified Ceramic Brake Pads Part Number DBP001 Designed for Durable Performance and Stopping Power in Heavy Duty Vehicles

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Hardware Included: Yes
- Thickness: 12 Mm
- Oem: MN102618
- Position: Front
- Quantity: 4 Pieces Per Set
- Type: Parking Brake
- Color: Black / Grey
- Product Placement: Front And Rear

Product Description:

The Disc Brake Pad Set is an essential component designed to enhance the braking performance and safety of your vehicle. This set includes 4 high-quality pieces, perfectly suited for both front and rear installation, ensuring comprehensive coverage and optimal stopping power. Whether you are replacing worn-out pads or upgrading your braking system, these disc brake pads offer reliable performance and durability that drivers can trust.

One of the standout features of this brake pad set is its thickness of 12 mm. This substantial thickness provides a longer lifespan and improved heat dissipation, which is crucial during intense braking conditions. The 12 mm thickness helps maintain consistent brake performance, reducing the risk of brake fade and ensuring smoother stops every time you press the pedal. This makes the set an excellent choice for everyday driving as well as more demanding situations.

Weighing approximately 1.2 kg per set, these brake pads are engineered to deliver a perfect balance between strength and weight. The weight is optimized to provide solid, stable braking without adding unnecessary bulk to your vehicle's braking system. This ensures that the brake pads contribute to overall vehicle efficiency and performance without compromising safety or comfort.

The product placement versatility is another significant advantage of this disc brake pad set. Designed for both front and rear applications, these pads provide a universal solution that can be used on various vehicle models. This flexibility simplifies the buying process and ensures that you have a consistent braking feel on all wheels, which is vital for vehicle control and safety.

In terms of aesthetics, the brake pads come in a sleek black and grey color combination. This classic color scheme not only looks professional but also helps in identifying the brake pads during installation and maintenance. The black and grey tones are also indicative of the high-quality materials used, which contribute to the pads' excellent performance and longevity.

When it comes to material quality, these disc brake pads are crafted from what is considered the best brake pad material available in the market. This ensures that the pads offer superior friction levels, reduced noise, and minimal dust generation. The advanced material formulation also enhances the brake pads' resistance to wear and heat, providing consistent braking performance even under heavy use. Furthermore, these brake pads meet or exceed OEM brake pads standards, making them a reliable replacement option that maintains the original equipment manufacturer's quality and specifications. Choosing brake pads that align with OEM standards guarantees compatibility with your vehicle's braking system, optimal safety, and performance that drivers expect from factory-installed components.

In summary, this Disc Brake Pad Set is a premium solution for vehicle owners seeking durable, high-performance brake pads that deliver excellent stopping power and safety. With 4 pieces included, a robust 12 mm thickness, and a weight of approximately 1.2 kg per set, these brake pads are designed for both front and rear placement, ensuring comprehensive braking coverage. The black and grey color scheme complements their professional quality, while the use of the best brake pad material and adherence to OEM brake pads standards guarantee reliability and longevity. Upgrade your braking system with this exceptional disc brake pad set and experience enhanced control, safety, and confidence on the road.

Features:

- Product Name: Disc Brake Pad Set
- Quantity: 4 Pieces Per Set
- Number of Pieces: 4
- Interchange Part Number: D1293, D1222
- Product Placement: Front and Rear
- Thickness: 12 mm
- High-quality disc brake pads for reliable stopping power
- Good ceramic brake pads designed for durability and low noise
- Compatible disc brake pads suitable for various vehicle models

Technical Parameters:

OEM	MN102618
Type	Parking Brake
Quantity	4 Pieces Per Set
Hardware Included	Yes
Interchange Part Number	D1293, D1222
Color	Black / Grey
Weight	Approximately 1.2 Kg Per Set
Thickness	12 Mm
Position	Front
Part Number	DBP-001

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is a premium-quality braking solution designed to deliver superior performance and safety in a variety of driving conditions. Originating from China, this set weighs approximately 1.2 kg per set and is compatible with the GRL braking system, making it an ideal choice for both front and rear product placement on your vehicle. Whether you are a daily

commuter, a weekend adventurer, or a professional driver, these brake pads are engineered to meet your braking needs with reliability and precision.

One of the primary application occasions for the Herito Disc Brake Pad Set is in routine vehicle maintenance and brake system upgrades. When replacing worn-out brake components, using the best ceramic brake pads ensures enhanced stopping power, reduced noise, and longer lifespan compared to traditional brake pads. The inclusion of hardware and the OEM number MN102618 further guarantees an easy and precise installation process, especially when paired with a reliable brake pad tool. This makes the Herito brake pads an excellent choice for automotive workshops and DIY enthusiasts alike.

In addition to everyday driving, these brake pads are well-suited for more demanding scenarios such as city traffic, highway cruising, and even off-road excursions. The best ceramic brake pads provide excellent heat dissipation and consistent performance under varying temperatures, which is crucial for maintaining safety during sudden stops or emergency braking situations. Their robust design ensures that your braking system remains responsive, reducing the risk of brake fade and maintaining optimal control.

Another common scenario for the use of the Herito Disc Brake Pad Set is in vehicle customization and performance tuning. Car enthusiasts looking to upgrade their braking system to the latest ceramic technology will find this product an ideal match. The set's compatibility with both front and rear brakes allows for a balanced and comprehensive upgrade, improving overall vehicle handling and safety.

Moreover, the Herito brand's commitment to quality and the inclusion of necessary hardware make this brake pad set a dependable choice for automotive manufacturers and suppliers seeking OEM-certified parts. The set's alignment with the OEM number MN102618 ensures compatibility with a wide range of vehicle models, facilitating easy integration into existing braking systems.

In summary, the Herito Disc Brake Pad Set ZK-10001 is perfect for various application occasions and scenarios, including routine maintenance, high-performance driving, and professional use. With its best ceramic brake pads, included hardware, and compatibility with front and rear brake placements, this set offers a comprehensive braking solution designed to enhance safety, durability, and driving comfort across multiple environments.

Customization:

Herito presents the ZK-10001 Disc Brake Pad Set, expertly designed for optimal performance in your vehicle's front parking brake system. Manufactured in China, these disc brake pads feature a durable black and grey color scheme, ensuring both style and functionality. Engineered with the GRL braking system in mind, this set offers the best brake pad material to guarantee superior stopping power and longevity. The ZK-10001 is an OEM-approved product with the code MN102618, providing reliable fitment and compatibility. Choose Herito's disc brake pads for enhanced safety and exceptional braking performance.

Support and Services:

Our Disc Brake Pad Set is designed to provide reliable and efficient braking performance for a wide range of vehicles. To ensure optimal functionality and safety, please follow the installation and maintenance guidelines carefully.

Installation should be performed by a qualified technician using appropriate tools. Always replace brake pads in pairs to maintain balanced braking and avoid uneven wear.

Regular inspection of the brake pads and related components is essential. Check for signs of wear, glazing, or damage, and replace the pads if the thickness falls below the manufacturer's recommended limit.

For best results, avoid aggressive braking during the initial break-in period to allow the pads to properly bed into the rotors. This will help maximize performance and longevity.

If you experience any unusual noises, vibrations, or reduced braking efficiency, have your braking system inspected immediately by a professional to prevent potential safety hazards.

We are committed to supporting our customers with quality products and services. Please refer to the product manual for more detailed instructions and troubleshooting tips.
