

Black Grey Disc Brake Pad Set Thickness 12 Mm Oem MN102618 Suitable for Heavy Duty Applications and Industrial Machinery

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Oem: MN102618
- Part Number: DBP-001
- Certifications: ISO 9001, SAE J661
- Hardware Included: Yes
- Noise Level: Low Noise Operation
- Color: Black / Grey
- Interchange Part Number: D1293 D1222
- Thickness: 12 Mm

Product Description:

The Disc Brake Pad Set is an essential component designed to provide superior braking performance and reliability for your vehicle. Specifically engineered to fit the front position, this brake pad set is an ideal choice for those seeking the best ceramic brake pads on the market. With a focus on quality, durability, and safety, these brake pads are engineered to meet and exceed the demands of modern braking systems, ensuring that your vehicle stops smoothly and efficiently under various driving conditions.

One of the standout features of this Disc Brake Pad Set is its compatibility with the GRL braking system, making it a perfect match for vehicles equipped with this advanced system. The set is identified by interchange part numbers D1293 and D1222, offering ease of replacement and compatibility assurance for consumers and mechanics alike. This ensures that you can confidently purchase the brake pads knowing they will fit perfectly and function seamlessly with your existing braking system.

The Disc Brake Pad Set comes in an attractive black and grey color scheme, which not only adds to the aesthetic appeal but also indicates the high-quality materials used in its construction. These colors are typical of premium ceramic brake pads, which are known for their enhanced performance characteristics. The ceramic material used in these pads offers numerous benefits such as reduced brake dust, quieter operation, and longer lifespan compared to traditional brake pads.

Weighing approximately 1.2 kilograms per set, these brake pads strike an excellent balance between sturdiness and efficiency. The weight is optimized to provide effective braking force without adding unnecessary bulk, which can affect vehicle handling and fuel efficiency. This weight consideration also facilitates easier handling during installation and replacement, making it a convenient choice for mechanics and DIY enthusiasts.

Installing this Disc Brake Pad Set is straightforward, especially when using the proper brake pad tool. A brake pad tool is recommended to ensure that the brake pads are installed correctly and safely, preventing any issues related to improper fitment or alignment. Using the correct tool also helps maintain the integrity of the brake pads and the braking system, ensuring optimal performance and longevity.

These ceramic brake pads are designed to offer exceptional stopping power, even under demanding driving conditions such as heavy traffic, wet roads, or steep downhill descents. The advanced ceramic compound provides consistent friction levels, which translates to reliable braking performance, reduced fade, and enhanced safety for you and your passengers. Moreover, ceramic brake pads tend to generate less heat and wear more evenly, contributing to the overall health of your braking system.

In addition to their performance benefits, ceramic brake pads are also known for their environmentally friendly properties. They produce less brake dust, which means your wheels stay cleaner and there is reduced particulate pollution compared to other types of brake pads. This makes the Disc Brake Pad Set not only a smart choice for your vehicle but also a responsible choice for the environment.

In summary, the Disc Brake Pad Set with interchange part numbers D1293 and D1222 is a premium product designed for the front position on vehicles with a GRL braking system. Its black and grey ceramic construction, coupled with a weight of approximately 1.2 kg per set, ensures optimal performance, durability, and ease of installation. Whether you are a professional mechanic or a car enthusiast, investing in the best ceramic brake pads will enhance your vehicle's safety and performance. Remember to use a brake pad tool for installation to achieve the best results and maintain the integrity of your braking system. Choose this Disc Brake Pad Set for a trusted, reliable, and high-quality braking solution that stands out in the category of ceramic brake pads.

Features:

- High-quality disc brake pads for reliable stopping power
- Suitable for both front and rear placement
- Designed specifically as a parking brake type
- Lightweight design with approximately 1.2 Kg per set
- Optimized for front position installation
- Low noise operation ensures a quiet driving experience
- Compatible with standard brake pad tool for easy installation
- From the best brake pad brand, ensuring durability and performance

Technical Parameters:

Part Number	DBP-001
Weight	Approximately 1.2 Kg Per Set
Hardware Included	Yes
Number Of Pieces	4
Noise Level	Low Noise Operation
OEM	MN102618
Thickness	12 Mm
Type	Parking Brake
Certifications	ISO 9001, SAE J661
Color	Black / Grey

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to deliver superior braking performance and reliability, making it an

ideal choice for a wide range of application occasions and scenarios. Manufactured in China and certified with ISO 9001 and SAE J661 standards, these ceramic brake pads are engineered to meet the highest quality and safety requirements. As an OEM part with the number MN102618, the Herito brake pads ensure compatibility and optimal performance for various vehicle makes and models, specifically designed for the front position of your vehicle's braking system.

When it comes to everyday driving, the Herito ceramic brake pads stand out as the best ceramic brake pads for ensuring smooth, low noise operation. Whether you are commuting in urban traffic, navigating suburban roads, or cruising on highways, these brake pads provide consistent stopping power with minimal noise and dust. This makes them perfect for daily use in passenger cars, where comfort and quiet braking are highly valued.

Beyond daily commuting, the Herito Disc Brake Pad Set excels in more demanding driving scenarios such as long-distance travel and mountainous terrain. The ceramic brake pads offer excellent heat dissipation and wear resistance, which translates to enhanced durability and safer braking performance under heavy loads or frequent braking conditions. Drivers who frequently encounter stop-and-go traffic or steep descents will appreciate the reliable friction and fade resistance these brake pads deliver.

In addition to practical daily and long-distance driving, the Herito ceramic brake pads are well-suited for drivers who seek to upgrade their vehicle's braking system with premium components. Known as the best ceramic brake pads in the market, they provide a quieter and cleaner alternative to traditional metallic pads, reducing brake dust buildup and maintenance efforts. This makes them an excellent choice for enthusiasts who want to maintain the aesthetic and performance quality of their vehicles.

Overall, the Herito Disc Brake Pad Set (DBP-001) is versatile and dependable, perfectly fitting various driving conditions and user needs. From urban streets to challenging terrains, and from everyday errands to extended road trips, these ceramic brake pads ensure your vehicle's front braking system operates efficiently, quietly, and safely at all times.

Customization:

Herito offers premium product customization services for the Disc Brake Pad Set, model number ZK-10001. Manufactured in China, this set (part number DBP-001) weighs approximately 1.2 Kg per set and features a thickness of 12 mm. As a trusted name in the automotive industry, Herito is recognized as the best brake pad brand, delivering high-quality ceramic brake pads designed specifically for parking brake applications.

Our customization options allow you to tailor the ceramic brake pad to meet your specific vehicle requirements. Whether you need OEM specifications like MN102618 or specialized adjustments, Herito ensures optimal performance and durability. Choose Herito for reliable, expertly crafted ceramic brake pads that enhance safety and braking efficiency.

Support and Services:

Our Disc Brake Pad Set is engineered to provide superior stopping power and long-lasting performance for a variety of vehicle types. Each set is manufactured using high-quality friction materials that ensure consistent braking and minimal noise under various driving conditions.

For optimal performance, it is recommended to replace brake pads in pairs and to inspect the brake system regularly. Proper installation is crucial; please refer to the vehicle's service manual for detailed instructions or consult a professional mechanic.

If you experience any issues such as unusual noises, vibrations, or reduced braking efficiency, please discontinue use immediately and have your brake system inspected by a qualified technician. Our product is designed to meet or exceed OEM specifications, ensuring safety and reliability.

We offer comprehensive technical support to assist with installation guidance, troubleshooting, and warranty claims. Please ensure that you have your product details and vehicle information ready when seeking assistance.

Regular maintenance and timely replacement of brake components are essential for vehicle safety. Use only genuine parts and follow recommended service intervals to maintain optimal braking performance.
