

## Hardware Included Yes Disc Brake Pad Set Number Of Pieces 4 SAE J661 Certified Brake Components for Commercial Vehicles

Our Product Introduction

for more products please visit us on [heritobrake.com](http://heritobrake.com)

### Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

### Product Specification

- Quantity: 4 Pieces Per Set
- Certifications: ISO 9001, SAE J661
- Part Number: DBP-001
- Oem: MN102618
- Product Placement: Front And Rear
- Position: Front
- Thickness: 12 Mm
- Noise Level: Low Noise Operation

Product Description:

The Disc Brake Pad Set is an essential component designed to ensure optimal braking performance and safety for your vehicle. Specifically engineered for the front position, this set includes four high-quality brake pads, providing a complete solution for front brake maintenance and replacement. With 4 pieces per set, it is perfectly suited for vehicles that require a full set of front brake pads, offering convenience and value in one package.

One of the standout features of this Disc Brake Pad Set is its compatibility with multiple interchange part numbers, including D1293 and D1222. This interchangeability means that the brake pads can seamlessly replace a variety of original equipment manufacturer (OEM) parts, making it a versatile choice for many vehicle makes and models. Whether you are a professional mechanic or a car enthusiast performing your own maintenance, this flexibility ensures you have the right fit for your braking system.

In addition to its primary placement at the front, this product is also suitable for use in both front and rear brake systems, depending on the specific vehicle requirements. This dual placement capability makes the Disc Brake Pad Set a practical option for those looking to maintain consistent braking performance across their entire vehicle. It's important to note that although primarily positioned at the front, the design and material composition meet the rigorous demands of both front and rear brake applications.

When it comes to selecting brake pads, quality and reliability are paramount. This Disc Brake Pad Set is produced by one of the best brake pad brands in the industry, known for its commitment to excellence and innovation. By choosing this set, you are investing in good ceramic brake pads that offer superior performance, durability, and noise reduction compared to standard brake pad materials. Ceramic brake pads are renowned for their ability to provide smooth braking, minimal dust production, and long-lasting wear, making them an ideal choice for both everyday driving and more demanding conditions.

The ceramic composition of these brake pads ensures excellent heat dissipation, which reduces the risk of brake fade during intensive use. This characteristic is particularly important for drivers who frequently navigate hilly terrain, tow heavy loads, or engage in spirited driving. Additionally, the low dust generation helps keep your wheels cleaner and reduces the need for frequent cleaning, contributing to the overall maintenance ease of your vehicle.

Safety is always the top priority when it comes to braking components, and this Disc Brake Pad Set delivers consistent and reliable stopping power. The precise engineering and high-quality materials used in manufacturing guarantee that these pads will perform effectively under various driving conditions, providing confidence and peace of mind every time you hit the brakes.

Furthermore, the installation process is straightforward, thanks to the exact fitment and compatibility with standard braking systems. Whether you are replacing worn-out pads or upgrading your current setup, these brake pads offer a hassle-free installation experience, allowing you to get back on the road quickly and safely.

In summary, the Disc Brake Pad Set for the front position, comprising 4 pieces per set and interchangeable with part numbers D1293 and D1222, represents a perfect blend of quality, performance, and versatility. Produced by the best brake pad brand, these good ceramic brake pads provide exceptional braking efficiency, durability, and cleanliness, making them an excellent choice for maintaining or upgrading your vehicle's braking system. Whether used in the front or rear, this brake pad set ensures reliable stopping power and enhanced safety for your driving experience.

Features:

- Product Name: Disc Brake Pad Set
- Includes Hardware: Yes
- Position: Front
- Interchange Part Numbers: D1293, D1222
- Part Number: DBP-001
- Product Placement: Front And Rear
- High-quality ceramic brake pad material for superior performance
- Known as one of the best ceramic brake pads for durability and low noise
- Designed to provide reliable stopping power with minimal dust

Technical Parameters:

|                   |                    |
|-------------------|--------------------|
| Quantity          | 4 Pieces Per Set   |
| Type              | Parking Brake      |
| Color             | Black / Grey       |
| Product Placement | Front And Rear     |
| OEM               | MN102618           |
| Thickness         | 12 Mm              |
| Number Of Pieces  | 4                  |
| Certifications    | ISO 9001, SAE J661 |
| Position          | Front              |
| Braking System    | GRL                |

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is an essential component for ensuring optimal braking performance in a variety of vehicles. Manufactured in China, this set includes 4 pieces per set, available in sleek black and grey colors, making it a reliable choice for drivers who demand the best. With part number DBP-001 and interchangeable part numbers D1293 and D1222, this brake pad set is designed to fit seamlessly into compatible braking systems, providing exceptional stopping power and durability.

These disc brake pads are ideal for a wide range of application occasions and scenarios. Whether you are a professional mechanic or a car enthusiast performing routine maintenance, the Herito brake pads serve as the perfect replacement or upgrade parts. When working in automotive repair shops or DIY garages, having the best brake pad material ensures safety and efficiency. The Herito ZK-10001 brake pads are engineered to offer superior friction performance, heat dissipation, and wear resistance, making them suitable for daily commuting, long-distance driving, and even high-performance applications.

Using the Herito Disc Brake Pad Set alongside the appropriate brake pad tool can simplify the installation process, ensuring a precise fit and secure attachment. This makes it an excellent choice not only for standard brake repair but also for more complex brake system overhauls. The consistent quality and reliable stopping power provided by Herito, recognized as one of the best brake pad brands in the industry, guarantee peace of mind on the road, whether navigating urban traffic or challenging terrains.

Furthermore, this brake pad set is suitable for a variety of vehicle types, including passenger cars, SUVs, and light trucks, making it a versatile solution for different braking needs. The combination of high-quality materials and meticulous manufacturing standards ensures minimal noise, reduced brake dust, and prolonged pad life. As a result, the Herito ZK-10001 disc brake pads are not only a smart investment for vehicle safety but also contribute to maintaining the overall performance and value of your vehicle.

In summary, the Herito Disc Brake Pad Set embodies the qualities of the best brake pad material and brand, offering durability, reliability, and ease of installation. Whether used in professional automotive workshops or by individual vehicle owners, these brake pads excel in various occasions and scenarios, making them the go-to choice for effective and safe braking performance.

## Customization:

Herito offers the best brake pad brand with the ZK-10001 Disc Brake Pad Set, expertly designed and manufactured in China. This set includes 4 high-quality ceramic brake pads, available in sleek black and grey colors, suitable for both front and rear placement. Our OEM brake pads, identified by the OEM code MN102618, are compatible with the GRL braking system, ensuring optimal performance and safety. Customize your vehicle with Herito's reliable and durable brake pad sets for superior braking experience.

## Support and Services:

Our Disc Brake Pad Set is designed to provide reliable and efficient braking performance for a variety of vehicles. For technical support, please ensure that the brake pads are installed according to the manufacturer's specifications and that all components are inspected regularly for wear and damage.

When installing the Disc Brake Pad Set, it is important to clean the brake rotor surface thoroughly and apply the appropriate brake lubricant to the backing plate to prevent noise and ensure smooth operation. Always replace brake pads in pairs to maintain balanced braking performance.

If you experience any issues such as unusual noises, reduced braking efficiency, or vibration, please check for proper installation, rotor condition, and compatibility with your vehicle. Refer to the product manual for detailed installation instructions and maintenance guidelines.

For optimal product performance and safety, use only genuine replacement parts and avoid mixing different brake pad materials or brands. Regular maintenance and inspection are essential to ensure the longevity and effectiveness of your disc brake system.

We are committed to providing excellent customer support and technical assistance to help you maintain the highest standards of vehicle safety and performance.
