Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Oem: MN102618
- Braking System: GRL
- Type: Parking Brake
- Thickness: 12 Mm
- Product Placement: Front And Rear
- Hardware Included: Yes
- Interchange Part Number: D1293 D1222
- Certifications: ISO 9001, SAE J661

Product Description:

The Disc Brake Pad Set is an essential component designed to provide superior stopping power and enhanced safety for your vehicle. Specifically engineered for the front position, these brake pads are crafted to meet the rigorous demands of modern braking systems, ensuring reliable and consistent performance every time you hit the brakes. Whether you are replacing your OEM brake pads or upgrading to a higher quality option, this set offers an excellent balance of durability, efficiency, and quiet operation.

One of the standout features of this Disc Brake Pad Set is its compatibility with both front and rear placements, making it a versatile choice for a wide range of vehicle models. This flexibility ensures that you can maintain uniform braking performance across all wheels, contributing to better vehicle control and enhanced safety on the road. The pads have a thickness of 12 mm, which is ideal for providing long-lasting wear resistance while maintaining optimal braking power. This thickness also means that the pads can handle extended use without compromising their effectiveness.

Included with the Disc Brake Pad Set is all the necessary hardware, so you have everything required for a hassle-free installation. The inclusion of this hardware eliminates the need for additional purchases, making the replacement process more convenient and cost-effective. Additionally, the set is designed to be compatible with GRL braking systems, ensuring seamless integration with your vehicle's existing components. This compatibility guarantees that the brake pads will function efficiently within the system, providing smooth and responsive braking performance.

For those who prefer to carry out their own maintenance, using a brake pad tool in conjunction with these pads can significantly simplify the installation process. A brake pad tool helps in properly compressing the caliper pistons and aligning the pads, which is crucial for achieving the best brake performance and avoiding premature wear. This makes the Disc Brake Pad Set not only an ideal replacement but also a user-friendly option for DIY enthusiasts and professional mechanics alike.

When it comes to choosing brake pads, many vehicle owners look for the best ceramic brake pads available on the market. Ceramic brake pads are known for their quiet operation, minimal dust production, and excellent heat dissipation properties. This Disc Brake Pad Set embodies all these advantages, providing an upgrade that can enhance your driving experience by reducing noise and extending the lifespan of your braking system. The ceramic material also ensures consistent braking performance under various driving conditions, from city commuting to highway cruising.

Moreover, these brake pads meet or exceed OEM specifications, so you can trust that they offer the quality and reliability you expect from original manufacturer components. This adherence to OEM standards ensures that the brake pads will fit perfectly and perform reliably, maintaining the safety and integrity of your vehicle's braking system. Choosing this Disc Brake Pad Set means investing in a product that combines the best of OEM quality with the benefits of advanced ceramic technology.

In summary, the Disc Brake Pad Set is a top-tier choice for anyone looking to replace or upgrade their vehicle's front brake pads. Its 12 mm thickness, compatibility with front and rear placements, inclusion of necessary hardware, and suitability for GRL braking systems make it a comprehensive and convenient option. Coupled with the advantages of the best ceramic brake pads and the ease of installation using a brake pad tool, this set ensures that your vehicle's braking system remains efficient, safe, and reliable. Whether you are maintaining your vehicle or enhancing its performance, these brake pads offer exceptional value and peace of mind on every drive.

Features:

- Product Name: Disc Brake Pad Set
- Position: Front
- Quantity: 4 Pieces Per Set
- OEM Number: MN102618
- Number of Pieces: 4
- Part Number: DBP-001
- High-quality disc brake pads for reliable stopping power
- Good ceramic brake pads designed for durability and quiet performance
- Includes ceramic brake pad material for enhanced heat resistance and reduced brake dust

Technical Parameters:

Color	Black / Grey
Braking System	GRL
Interchange Part Number	D1293, D1222
Position	Front
Hardware Included	Yes
OEM	MN102618
Certifications	ISO 9001, SAE J661
Weight	Approximately 1.2 Kg Per Set
Part Number	DBP-001
Noise Level	Low Noise Operation

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to deliver exceptional performance in a variety of automotive braking applications. Manufactured in China, this set is engineered specifically for use with the GRL braking system and includes 4 high-quality pieces to ensure comprehensive coverage and reliable stopping power. As a parking brake type, these pads play a crucial role in maintaining vehicle safety during stationary periods, preventing unwanted movement on inclines or uneven surfaces. These good ceramic brake pads from Herito are well-suited for both daily driving and more demanding scenarios where consistent braking performance is essential. Whether you are navigating busy urban streets or tackling steep hills, the ceramic brake pad material provides excellent heat dissipation and reduced noise, making it one of the best ceramic brake pads options available in the market today. This characteristic ensures smooth and quiet braking, which is highly desirable for both passenger vehicles and light commercial trucks. The Herito ZK-10001 disc brake pads are ideal for use in various occasions such as routine vehicle maintenance, brake system upgrades, and emergency replacements. Their compatibility with interchange part numbers D1293 and D1222, as well as OEM number MN102618, ensures they fit a wide range of vehicle models, making them versatile for mechanics and car owners alike. The robust construction and ceramic composition also mean these pads are perfect for use in climates with frequent stop-and-go traffic, where brake fade resistance is critical.

In practical scenarios, whether parking on a steep driveway, in a busy parking garage, or on roadside inclines, the Herito ceramic brake pad set provides dependable holding power. The parking brake type design specifically enhances safety by preventing vehicle roll-back. Additionally, these pads are excellent for long-term use, offering durability and consistent braking performance that drivers can trust. Overall, the Herito Disc Brake Pad Set ZK-10001 is an excellent choice for anyone seeking the best ceramic brake pads for their vehicle's parking brake system. With its superior ceramic composition, compatibility with multiple part numbers, and reliable performance in various driving and parking conditions, this product stands out as a top-tier option to ensure vehicle safety and driver confidence.

Customization:

Herito offers customization services for the Disc Brake Pad Set, model number ZK-10001, made in China. This set includes 4 pieces per set and comes with all necessary hardware included. Known for its low noise operation, these ceramic brake pads are designed to provide the best ceramic brake pads performance for a smooth and quiet braking experience. We also provide OEM services under MN102618, ensuring that our brake pad tool compatibility meets your specific requirements. Choose Herito for reliable, high-quality brake pad solutions tailored to your needs.

Support and Services:

Our Disc Brake Pad Set is designed to deliver reliable and consistent braking performance under various driving conditions. For optimal results, ensure proper installation by following the provided instructions or consulting a professional technician.

If you experience any unusual noises, vibrations, or reduced braking efficiency, inspect the brake pads for wear or damage and replace them if necessary. Regular maintenance checks will help extend the lifespan of your brake pads and maintain vehicle safety.

We recommend using compatible brake fluid and avoiding contamination of the brake pads with grease or oil. Always break in new brake pads according to the manufacturer's guidelines to achieve maximum performance.

For any technical issues or questions regarding the Disc Brake Pad Set, please refer to the product manual or visit our support website for troubleshooting tips and detailed guidance.

Our customer service team is committed to assisting you with warranty claims, part replacements, and product information to ensure your satisfaction and safety on the road.
