

Front And Rear Disc Brake Pad Set DBP001 OEM MN102618 Optimized Brake Components Designed for Operation in Diverse Environments

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Hardware Included: Yes
- Part Number: DBP-001
- Certifications: ISO 9001, SAE J661
- Product Placement: Front And Rear
- Type: Parking Brake
- Thickness: 12 Mm
- Quantity: 4 Pieces Per Set
- Number Of Pieces: 4

Product Description

Product Description:

The Disc Brake Pad Set is a high-quality replacement component designed to ensure optimal braking performance for your vehicle. Engineered with precision and durability in mind, this set includes everything you need for a seamless installation, including all necessary hardware. Whether you are servicing the front or rear brakes, this product is tailor-made to fit both positions, providing a versatile solution for maintaining your vehicle's safety and reliability.

One of the standout features of this Disc Brake Pad Set is its ceramic brake pad construction. Ceramic brake pads are renowned for their superior performance compared to traditional organic or semi-metallic pads. They offer excellent stopping power while producing less brake dust and noise, contributing to a cleaner and quieter driving experience. Additionally, ceramic brake pads tend to last longer, making them a cost-effective choice for drivers who prioritize longevity and consistent brake performance.

The set is identified by the original equipment manufacturer (OEM) number MN102618, ensuring compatibility with a wide range of vehicle makes and models. This OEM designation guarantees that the brake pads meet stringent quality standards and fit precisely as intended, reducing installation time and ensuring reliable braking performance.

Weighing approximately 1.2 kilograms per set, these disc brake pads provide a balanced combination of strength and lightweight design. The manageable weight contributes to easier handling during installation and helps maintain the vehicle's overall efficiency. This weight specification also reflects the robust materials used in manufacturing, which are designed to withstand the rigors of daily driving and demanding braking conditions.

Included with the brake pads is all necessary hardware, eliminating the need for additional purchases and simplifying the replacement process. This hardware package ensures that every component needed for a secure and proper fit is at your fingertips, making the brake pad replacement straightforward and hassle-free. The inclusion of the brake pad tool is particularly valuable, as it aids in the precise installation and adjustment of the brake pads, helping to avoid common installation errors and ensuring optimal brake system function. Designed for use on both the front and rear brakes, this Disc Brake Pad Set offers impressive versatility. While the product placement is specifically noted for front and rear applications, the position focus is on the front brakes, which typically endure the most braking force. This focus on the front position means you can trust the pads to handle high-stress braking situations with confidence, providing reliable stopping power when it matters most.

Disc brake pads play a crucial role in your vehicle's braking system by creating the friction needed to slow down or stop the wheels when the brakes are applied. This set's ceramic brake pads are engineered to deliver consistent friction and heat dissipation, reducing the risk of brake fade during prolonged or intense braking. The result is a safer driving experience with enhanced control and responsiveness.

In summary, the Disc Brake Pad Set with OEM number MN102618 is an excellent choice for drivers seeking durable, efficient, and easy-to-install brake components. Its ceramic brake pad material ensures superior braking performance with minimal noise and dust, while the inclusion of essential hardware and a brake pad tool simplifies the installation process. Suitable for both front and rear brake placements, and specifically designed for front position use, this set weighs approximately 1.2 kilograms per set, balancing strength and manageability. Trust this disc brake pads set to keep your vehicle's braking system performing at its best, ensuring safety and peace of mind on every drive.

Features:

Product Name: Disc Brake Pad Set

Noise Level: Low Noise Operation for a quiet driving experience

Color: Black / Grey

Interchange Part Number: D1293, D1222

Weight: Approximately 1.2 Kg Per Set

Certifications: ISO 9001, SAE J661 ensuring high quality and safety

Includes brake pad tool for easy installation

From the best brake pad brand known for durability and performance

Made with good ceramic brake pads for superior stopping power and reduced wear

Technical Parameters:

Color	Black / Grey
Quantity	4 Pieces Per Set
Type	Parking Brake
Number Of Pieces	4
Noise Level	Low Noise Operation
Part Number	DBP-001
Interchange Part Number	D1293 D1222
OEM	MN102618
Certifications	ISO 9001, SAE J661
Hardware Included	Yes

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to deliver exceptional performance and reliability for a wide range of vehicles. Manufactured in China, these front-position disc brake pads are engineered to work seamlessly with the GRL braking system, ensuring optimal stopping power and enhanced safety on the road. With a thickness of 12 mm and available in sleek black and grey colors, these brake pads not only provide durability but also offer a clean, professional look to your braking components. These disc brake pads are perfect for drivers who demand the best ceramic brake pads for their vehicles. Herito's ZK-10001 brake pads are recognized as good ceramic brake pads, offering excellent heat dissipation, reduced brake fade, and minimal dust generation. Whether you are commuting in urban traffic, driving on highways, or navigating mountain roads, these brake pads provide consistent braking performance under various conditions. The hardware included with the set simplifies installation, making it convenient for both professional mechanics and DIY enthusiasts.

Ideal for everyday driving as well as more demanding scenarios, the Herito disc brake pads are highly suitable for occasions such as long-distance travel, city driving, and even occasional spirited driving. Their ceramic composition ensures quieter braking compared to traditional metallic pads, making them a great choice for those seeking a smoother and quieter ride. These pads excel in wet and dry conditions alike, providing dependable stopping power in rainy weather or on slick surfaces.

In addition to personal vehicles, the Herito front disc brake pads are also well-suited for commercial and fleet vehicles that require reliable and durable braking components. Their robust construction and compatibility with the GRL braking system make them a versatile option for a variety of vehicle types and models. Whether you are upgrading your current brake system or replacing worn-out pads, the Herito ZK-10001 disc brake pads stand out as one of the best ceramic brake pads available on the market today.

In summary, the Herito Disc Brake Pad Set offers a perfect blend of performance, durability, and ease of installation. Their design and material quality position them as good ceramic brake pads that enhance vehicle safety and driving comfort. Choose Herito for a trusted brake solution that meets the demands of modern driving while delivering the reliability and efficiency you need every day.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, manufactured in China. Designed for both front and rear placement, these brake pads are made from the best ceramic brake pads material, ensuring superior performance and durability. The interchangeable part numbers D1293 and D1222 provide versatile compatibility for various vehicle models. Our disc brake pads feature low noise operation, making them ideal for drivers seeking quiet and efficient braking. Certified by ISO 9001 and SAE J661, the Herito brake pads meet the highest quality and safety standards. The braking system used is GRL, which enhances the overall braking performance and reliability.

Choose Herito's customized disc brake pad sets for the best brake pad material available in the market. Experience the benefits of the best ceramic brake pads that combine longevity, safety, and low noise for an optimal driving experience.

Support and Services:

Our Disc Brake Pad Set is designed to provide reliable and efficient braking performance for a wide range of vehicles. Each set undergoes rigorous testing to ensure durability, heat resistance, and optimal stopping power under various driving conditions. Installation of the brake pads should be performed by a qualified technician to ensure proper fitment and function. It is recommended to inspect the brake rotors and replace or resurface them if necessary to maintain optimal braking performance. For best results, always replace brake pads in pairs on the same axle to maintain balanced braking. Regular inspection and maintenance of your braking system will help extend the life of the brake pads and ensure safety.

If you experience any issues such as unusual noise, vibration, or decreased braking performance, please consult a professional mechanic immediately. Using genuine replacement parts and following the vehicle manufacturer's guidelines will help maintain the integrity of your braking system.

Our technical support team is available to assist with installation guidance, troubleshooting, and product inquiries to ensure you get the most out of your Disc Brake Pad Set.
