Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Part Number: DBP-001
- Hardware Included: Yes
- Braking System: GRL
- Product Placement: Front And Rear
- Thickness: 12 Mm
- Interchange Part Number: D1293 D1222
- Quantity: 4 Pieces Per Set
- Oem: MN102618

Product Description:

The Disc Brake Pad Set, part number DBP-001, is a high-quality front parking brake solution designed to meet the rigorous demands of modern vehicles. Engineered with precision and manufactured under strict quality control standards, this brake pad set offers exceptional performance, reliability, and safety. Certified to ISO 9001 and SAE J661 standards, these brake pads assure customers of their superior manufacturing quality and compliance with industry benchmarks.

One of the standout features of this Disc Brake Pad Set is its classification as parking brake pads, specifically designed for the front position of your vehicle. Parking brake pads play a critical role in ensuring your vehicle remains securely stationary when parked, providing peace of mind whether you are on a steep incline or a flat surface. The DBP-001 model excels in this regard, delivering consistent holding power and long-lasting durability.

These brake pads are recognized among the best ceramic brake pads available in the aftermarket. Ceramic brake pads are known for their quiet operation, minimal dust generation, and excellent stopping power. The DBP-001 Disc Brake Pad Set harnesses these benefits, ensuring a smooth and comfortable braking experience while maintaining a clean wheel appearance. Their ceramic formulation also contributes to reduced wear on rotors, prolonging the lifespan of your braking system components.

Furthermore, the DBP-001 is designed to meet or exceed OEM brake pads specifications, making it a reliable replacement for original equipment manufacturer parts. OEM brake pads are the benchmark for compatibility and performance, and this product matches those standards to provide a seamless fit and function. Whether you are looking to replace worn-out OEM brake pads or upgrade your parking brake system, this Disc Brake Pad Set offers excellent value and peace of mind.

Included with the Disc Brake Pad Set is all necessary hardware for installation, ensuring a hassle-free replacement process. Having the hardware included eliminates the need for additional purchases and ensures that the pads are mounted correctly for optimal performance. This complete package approach demonstrates the manufacturer's commitment to customer convenience and satisfaction.

In summary, the DBP-001 Disc Brake Pad Set is an outstanding choice for anyone seeking reliable, high-quality parking brake pads for the front position. With certifications such as ISO 9001 and SAE J661, it guarantees manufacturing excellence and adherence to safety standards. Its ceramic composition ranks it among the best ceramic brake pads available, offering superior braking performance, reduced noise, and less rotor wear. Being engineered to meet OEM brake pads standards further cements its position as a trusted replacement part that ensures your vehicle's braking system operates efficiently and safely.

Whether you are a professional mechanic, a car enthusiast, or a vehicle owner looking for dependable parking brake pads, the DBP-001 Disc Brake Pad Set is designed to deliver outstanding stopping power and long-term durability. Its inclusion of hardware simplifies installation, and its front-position design ensures perfect compatibility with your vehicle's requirements. Choose this product for a blend of quality, performance, and value that aligns with the highest industry standards and your expectations for safety and functionality.

Features:

- Product Name: Disc Brake Pad Set
- Noise Level: Low Noise Operation for a quiet driving experience
- Thickness: 12 mm for durability and long-lasting performance
- Hardware Included: Yes, all necessary hardware included for easy installation
- Quantity: 4 Pieces Per Set, suitable for front or rear brakes
- Braking System: GRL compatible for reliable stopping power
- Made with high-quality ceramic brake pad material for enhanced performance
- Considered among the best ceramic brake pads for superior noise reduction and longevity
- Designed to meet or exceed OEM brake pads standards for quality and safety

Technical Parameters:

Type	Parking Brake
Weight	Approximately 1.2 Kg Per Set
Braking System	GRL
Part Number	DBP-001
Position	Front
Noise Level	Low Noise Operation
Interchange Part Number	D1293 D1222
Hardware Included	Yes
OEM	MN102618
Number Of Pieces	4

This Disc Brake Pad Set features the best brake pad material, utilizing ceramic brake pad technology to ensure optimal performance and durability. It is engineered for low noise operation, making it an excellent choice for those seeking the best brake pad material in the market.

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is designed to provide exceptional braking performance and reliability for a

wide range of vehicles. Manufactured in China, these disc brake pads feature a thickness of 12 mm, ensuring durability and long-lasting use. Available in classic black and grey colors, these front-positioned brake pads are engineered to meet or exceed OEM standards, including the part number MN102618, making them a trusted replacement option for various car models.

These disc brake pads are perfect for everyday driving scenarios such as city commuting, highway cruising, and stop-and-go traffic. Their design incorporates the best brake pad material, offering superior friction stability and heat resistance. This makes them an ideal choice for drivers who demand consistent and smooth braking performance under different road conditions. Whether you are navigating through urban streets or taking longer road trips, the Herito ZK-10001 pads ensure safety and control without compromising comfort.

In addition to daily driving, these good ceramic brake pads are excellent for more demanding applications like mountainous terrain or hilly areas where frequent braking is necessary. Their robust construction helps reduce brake fade and noise, providing a quieter and more comfortable driving experience. The interchange part numbers D1293 and D1222 highlight the versatility of these pads, making them compatible with a wide range of vehicles and a convenient option for mechanics and car enthusiasts seeking reliable replacements.

Furthermore, these Herito disc brake pads are suitable for use in automotive repair shops and service centers, where quality and performance are paramount. Their OEM certification ensures that they fit perfectly and function seamlessly with the existing braking system. Whether for professional installation or DIY maintenance, these pads provide peace of mind through consistent stopping power and enhanced safety.

Overall, the Herito ZK-10001 disc brake pad set combines advanced materials, precise engineering, and rigorous quality control to deliver some of the best brake pad material available on the market. Their use in various application occasions—from everyday commuting to more challenging driving conditions—makes them a dependable choice for anyone looking to upgrade or replace their vehicle's front brake pads with good ceramic brake pads that offer longevity, reliability, and superior braking performance.

Customization:

Herito offers the best brake pad brand with the ZK-10001 Disc Brake Pad Set, designed specifically as a parking brake solution. Manufactured in China, this high-quality ceramic brake pad set ensures optimal performance for both front and rear placement. The product includes all necessary hardware and is compatible with interchange part numbers D1293 and D1222. Featuring the advanced GRL braking system, these best ceramic brake pads deliver superior stopping power, durability, and low noise, making them the ideal choice for your vehicle's braking needs.

Support and Services:

Our Disc Brake Pad Set is designed to provide superior stopping power and enhanced durability for a wide range of vehicles. Engineered with high-quality friction materials, these brake pads ensure consistent performance under various driving conditions.

For optimal performance, it is recommended to replace brake pads in pairs and inspect the entire braking system regularly. Proper installation by a qualified technician is essential to maintain safety and efficiency.

We offer comprehensive technical support for our Disc Brake Pad Set, including detailed installation guides and troubleshooting assistance. Should you encounter any issues or have questions regarding compatibility, wear, or performance, our support team is ready to help.

To maximize the lifespan of your brake pads, avoid harsh braking when possible and ensure your rotors are in good condition. Regular maintenance and timely replacement of brake components contribute to safer driving and better vehicle control.

Our warranty covers manufacturing defects and ensures your satisfaction with the product. Please refer to the warranty documentation provided with your purchase for detailed terms and conditions.
