

Parking Brake Black Grey Brake Pad Tool Ergonomic Tool Providing Comfortable Grip and Enhanced Control During Brake Work

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-10001

Product Specification

- Product Placement: Front And Rear
- Position: Front
- Certifications: ISO 9001, SAE J661
- Weight: Approximately 1.2 Kg Per Set
- Color: Black / Grey
- Thickness: 12 Mm
- Interchange Part Number: D1293 D1222
- Noise Level: Low Noise Operation

Product Description

Product Description:

The Disc Brake Pad Set, model number DBP-001, is expertly designed to provide superior braking performance for vehicles equipped with the GRL braking system. Engineered with precision and manufactured to meet the highest OEM standards, including the MN102618 specification, this set is an essential upgrade for anyone seeking reliable, efficient, and safe braking solutions. Whether you are a daily commuter or an automotive enthusiast, these brake pads offer exceptional quality that ensures consistent stopping power under various driving conditions.

One of the standout features of this Disc Brake Pad Set is its use of high-grade ceramic materials. Ceramic brake pads are widely recognized as some of the best brake pad materials available on the market today. They are known for their excellent heat dissipation, reduced brake dust production, and quiet operation. This set exemplifies these benefits, making it a top choice when searching for good ceramic brake pads that deliver both performance and longevity.

With a total of four pieces included in each set, the DBP-001 ensures a perfect fit for your vehicle's disc brake system. The design and composition of these pads are optimized to work seamlessly with the GRL braking system, guaranteeing maximum friction and stable braking power. This compatibility not only enhances the overall driving experience but also contributes to maintaining the integrity of your vehicle's braking components.

In addition to performance, the Disc Brake Pad Set is also designed with durability and safety in mind. Weighing approximately 1.2 kilograms per set, these pads strike the ideal balance between sturdiness and lightweight construction. This weight specification helps in maintaining the vehicle's handling characteristics while providing robust resistance against wear and tear. As a result, you can expect longer service intervals and fewer replacements, making these pads a cost-effective investment for your vehicle's maintenance.

When it comes to braking efficiency, the best ceramic brake pads set the standard by providing consistent stopping power across a wide range of temperatures and driving scenarios. The DBP-001 set is no exception. Its advanced ceramic formulation delivers smooth, reliable braking without the harshness or noise often associated with other types of pads. This means enhanced control and confidence every time you apply the brakes, whether you are navigating city traffic or descending steep hills.

Moreover, the environmental benefits of ceramic brake pads cannot be overlooked. Unlike traditional metallic brake pads, ceramic pads produce significantly less brake dust, which helps keep your wheels cleaner and reduces airborne particulates that can contribute to pollution. This makes the DBP-001 not only a smart choice for performance but also a responsible choice for environmentally conscious drivers.

In summary, the Disc Brake Pad Set DBP-001 is an outstanding product that combines innovative ceramic technology with rigorous manufacturing standards to deliver the best brake pad material available for GRL braking systems. Its compatibility with OEM part number MN102618, combined with the inclusion of four expertly crafted pieces per set and a manageable weight of approximately 1.2 kilograms, makes it a comprehensive solution for anyone in need of high-quality brake pads. If you are searching for good ceramic brake pads that offer superior stopping power, durability, and quiet operation, this product is undoubtedly among the best ceramic brake pads you can find on the market today.

Features:

Product Name: Disc Brake Pad Set

Interchange Part Number: D1293, D1222

Noise Level: Low Noise Operation for a quiet driving experience

Weight: Approximately 1.2 Kg Per Set

Color: Black / Grey

Certifications: ISO 9001, SAE J661 certified for quality assurance

Made from high-quality materials to provide good ceramic brake pads performance

Considered among the best ceramic brake pads for durability and reliability

Designed as premium ceramic brake pads to ensure effective braking and safety

Technical Parameters:

Braking System	GRL
Interchange Part Number	D1293, D1222
Part Number	DBP-001
Color	Black / Grey
Thickness	12 Mm
Position	Front
Hardware Included	Yes
Quantity	4 Pieces Per Set
Noise Level	Low Noise Operation
OEM	MN102618

Applications:

The Herito Disc Brake Pad Set, model number ZK-10001, is an essential component designed to enhance the braking performance of . . .

vehicles equipped with the GRL braking system. Manufactured in China, this high-quality parking brake pad set includes four pieces and comes complete with all necessary hardware for easy installation. As a trusted OEM brake pads provider under the code MN102618, Herito ensures that each set meets stringent quality and safety standards, making it a reliable choice for both everyday drivers and automotive professionals.

These ceramic brake pads are specifically engineered to offer superior stopping power while minimizing noise and dust, making them the best brake pad material for drivers who prioritize safety and cleanliness. Their advanced composition ensures consistent performance under various driving conditions, including city commuting, highway cruising, and more demanding scenarios such as mountainous or hilly terrains where effective parking brake functionality is crucial.

The Herito Disc Brake Pad Set is ideal for a wide range of application occasions and scenarios. For instance, in urban environments where frequent stops are common, the ceramic brake pads provide smooth and responsive braking, reducing wear and tear on the braking system. In addition, these pads are highly effective in parking situations, securely holding the vehicle in place on inclines or uneven surfaces, which is vital for both safety and convenience.

Automotive repair shops and service centers also benefit from using Herito OEM brake pads due to their compatibility with factory specifications and ease of installation, thanks to the included hardware. This makes the ZK-10001 model a preferred choice for routine maintenance, brake system upgrades, or complete replacements.

Moreover, for car enthusiasts and DIY mechanics looking to maintain optimal vehicle performance, these ceramic brake pads offer durability and reliability, ensuring long-lasting braking efficiency. Whether it's daily driving, long-distance travel, or specialized usage requiring robust parking brake capabilities, the Herito Disc Brake Pad Set stands out as a dependable solution.

In summary, the Herito ZK-10001 Disc Brake Pad Set is suitable for a variety of vehicles and driving conditions, offering the best brake pad material in ceramic form, OEM quality assurance, and complete hardware inclusion. Its application spans from routine city driving to demanding parking brake scenarios, making it an indispensable component for safe and effective vehicle braking.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-10001, designed specifically for the front position. Manufactured in China, this set weighs approximately 1.2 Kg per set and features a high-quality parking brake type compatible with the GRL braking system. Our customization options ensure that you receive the best ceramic brake pads tailored to your vehicle's needs. We also provide specialized brake pad tools to assist with installation and maintenance. Compatible with interchange part numbers D1293 and D1222, Herito guarantees durability and superior performance with the best ceramic brake pads in the market.

Support and Services:

Our Disc Brake Pad Set is designed to provide superior stopping power and enhanced safety for your vehicle. For optimal performance, ensure the brake pads are installed by a qualified technician following the vehicle manufacturer's specifications.

Regular inspection and maintenance of the brake system are recommended to maximize the lifespan of the brake pads and maintain braking efficiency. Replace the brake pads if you notice any signs of wear, such as reduced braking performance, unusual noises, or vibrations.

Use only compatible brake fluid and avoid contamination of the brake components during installation. Refer to your vehicle's service manual for detailed instructions on brake system maintenance.

If you experience any issues with the Disc Brake Pad Set, please consult a professional technician for diagnosis and repair. Proper installation and maintenance are crucial to ensure your safety and the reliability of the braking system.
