

BNX braking system 4 brake pads set best ceramic brake pads engineered to provide stopping power for commercial fleets

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Brake Type: Disc Brakes
- Friction Coefficient: 0.35
- Installation: Easy To Install, Bolt-on Design
- Heat Resistant: Yes
- Wear Resistance: High Wear Resistance
- Placement On Vehicle: Front And Rear
- Brakeperformance: Excellent Stopping Power
- Heatresistance: Up To 650°F (343°C)

Product Description:

The Disc Brake Pad Set is an essential upgrade for any vehicle owner seeking enhanced braking performance and reliability. Designed with precision and durability in mind, this set offers everything you need to ensure your vehicle stops safely and efficiently under various driving conditions. Whether you are a daily commuter, a weekend enthusiast, or a professional driver, these brake pads deliver consistent performance and peace of mind.

One of the key features of this Disc Brake Pad Set is its comprehensive package contents. Each set includes 4 high-quality brake pads, providing a complete solution for most standard disc brake systems. This ensures that you have all the necessary components to replace the brake pads on both wheels of an axle, making installation straightforward and convenient.

Heat resistance is a critical factor when it comes to brake pads, and this set excels in that area. Built with advanced materials, these pads are designed to withstand high temperatures generated during braking without compromising their structural integrity or performance. This heat-resistant property helps in reducing brake fade, a common issue that occurs when brake pads overheat and lose their effectiveness. As a result, you can trust these pads to deliver reliable stopping power even under demanding driving conditions.

Weighing approximately 1.2 kilograms per set, these brake pads strike a perfect balance between durability and lightweight design. The relatively low weight contributes to better fuel efficiency and reduced unsprung weight, which can enhance your vehicle's handling and overall driving dynamics. Despite their light weight, these pads do not compromise on toughness or longevity, offering you a long-lasting braking solution.

Additionally, the Disc Brake Pad Set comes with essential accessories that facilitate an easy and secure installation process. These accessories include clips, shims, or any necessary hardware required to fit the brake pads properly in your vehicle's brake calipers. Having these accessories included means you won't need to purchase extra parts separately, saving you both time and money.

Performance-wise, these brake pads boast a friction coefficient of 0.35. This high friction level ensures strong braking force, allowing your vehicle to stop quickly and safely with minimal pedal effort. The consistent friction coefficient also contributes to smoother braking and reduced noise during operation, enhancing your overall driving experience.

When it comes to quality and reliability, this Disc Brake Pad Set is considered among the best brake pad brands available in the market today. Its ceramic construction positions it as one of the best ceramic brake pads, known for their superior heat dissipation, low dust generation, and quiet operation. Ceramic brake pads are favored for their ability to provide excellent braking performance while minimizing wear on brake rotors, making this set an economical and eco-friendly choice.

Moreover, for those who prefer a DIY approach to vehicle maintenance, this set pairs perfectly with a brake pad tool, making the replacement process smooth and hassle-free. A brake pad tool can assist in compressing caliper pistons and removing old pads safely, reducing the risk of damage and ensuring a proper fit for the new pads. Combining this set with the right brake pad tool means you can maintain your vehicle's braking system efficiently and effectively at home.

In summary, the Disc Brake Pad Set offers a complete, high-performance braking solution that includes 4 brake pads, heat resistance, integrated accessories, and a friction coefficient of 0.35. Its lightweight yet durable design, combined with its status as one of the best brake pad brands and best ceramic brake pads, makes it an ideal choice for drivers seeking safety, reliability, and value. Whether paired with a brake pad tool for DIY installation or installed by a professional, this set ensures your vehicle's braking system remains in top condition, delivering confidence and control every time you hit the road.

Features:

Product Name: Disc Brake Pad Set

Braking System: BNX

Installation: Easy To Install with Bolt-on Design

Heat Resistant: Yes, ensures durability under high temperatures

Product Code: DBPS

Placement On Vehicle: Suitable for both Front And Rear

Compatible with OEM brake pads for reliable performance

Designed for use with brake pad tool for precise installation

Recognized as the best brake pad brand for quality and safety

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, is an essential component designed to enhance the braking performance of your vehicle. Manufactured in China, this high-quality brake pad set is engineered to fit both the front and rear placements of the braking system, specifically compatible with the BNX braking system. Weighing approximately 1.2 kg per set, the Herito Disc Brake Pad Set offers reliability, durability, and superior stopping power for a wide range of driving occasions and scenarios.

One of the most common application occasions for the Herito Disc Brake Pad Set is everyday commuting. Whether you are driving through busy city streets or cruising on highways, these brake pads provide consistent and smooth braking performance. The friction coefficient of 0.35 ensures effective stopping power, making it an excellent choice for daily driving where safety and reliability are paramount.

For those who enjoy more demanding driving conditions such as mountainous terrains or long-distance travel, the Herito ceramic brake pads stand out as the best brake pad material option. Ceramic brake pads are known for their superior heat dissipation, reduced brake dust, and quieter operation compared to traditional organic or semi-metallic pads. The Herito ZK-38001 model utilizes ceramic material to deliver optimal performance even under high-stress braking scenarios, ensuring your vehicle maintains control and safety.

The Herito Disc Brake Pad Set is also perfect for performance-oriented driving and light off-road adventures. Thanks to the advanced BNX braking system compatibility and the excellent friction coefficient, these pads offer enhanced braking responsiveness and stability. Drivers who seek the best brake pad material for spirited driving will appreciate the balance of durability and performance provided by this ceramic brake pad set.

In urban stop-and-go traffic, the Herito brake pads reduce wear and tear on the braking components, prolonging the lifespan of your brake system. The product code DBPS signifies a trusted and tested solution for maintaining vehicle braking efficiency over time. Whether replacing worn-out pads or upgrading your current braking setup, the Herito Disc Brake Pad Set is designed to meet and exceed expectations across various driving environments.

In summary, the Herito ceramic brake pads with model number ZK-38001 offer versatile application occasions ranging from daily

commuting, long-distance travel, mountainous driving, to performance and light off-road scenarios. Combining the best brake pad material with a friction coefficient of 0.35, this brake pad set ensures your vehicle's braking system operates safely and effectively in both front and rear placements. Choose Herito for superior quality and dependable braking performance.

Customization:

Herito offers premium customization services for the Disc Brake Pad Set, model number ZK-38001, designed and manufactured in China. These brake pads are suitable for both front and rear placement on your vehicle, ensuring versatile application. Made from semi-metallic material, they provide the best brake pad material quality, combining durability and performance. With high wear resistance and excellent heat resistance, these pads maintain optimal braking efficiency under extreme conditions. Each package contains 4 brake pads, crafted to deliver the stopping power of the best ceramic brake pads while benefiting from the robustness of semi-metallic composition. Customize your brake pads with Herito to experience the ultimate in safety, reliability, and longevity.

Support and Services:

Our Disc Brake Pad Set is designed to provide optimal braking performance and durability for a wide range of vehicles. For technical support, please ensure that the brake pads are installed according to the manufacturer's specifications and that your vehicle is compatible with the product. Regular maintenance and inspection of the brake system are recommended to ensure safety and longevity. If you experience any issues such as unusual noises, vibrations, or reduced braking efficiency, check the installation and brake rotor condition. It is important to replace brake pads in pairs on the same axle to maintain balanced braking performance. We offer comprehensive services including product warranty, replacement parts, and expert advice on installation and maintenance. Our technical team is committed to helping you achieve the best results from your Disc Brake Pad Set and ensuring your vehicle's braking system functions reliably and safely.
