

Friction Coefficient 035 Disc Brake Pad Set Front And Rear Suitable For Commercial Vehicles Stopping Power And Long Service Life

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Brake Type: Disc Brakes
- Material: Semi-metallic
- Placement On Vehicle: Front And Rear
- Heatresistance: Up To 650°F (343°C)
- Package Contents: 4 Brake Pads
- Product Code: DBPS
- Accessories: Yes
- Product Placement: Front And Rear

Product Description

Product Description:

The Disc Brake Pad Set is engineered to deliver outstanding braking performance and reliability, making it an essential upgrade for any vehicle owner who prioritizes safety and efficiency. Designed with a friction coefficient of 0.35, these brake pads ensure optimal contact with the brake rotor, providing excellent stopping power in various driving conditions. Whether you're navigating city streets or tackling steep hills, this brake pad set offers consistent performance that you can trust.

One of the most significant advantages of this Disc Brake Pad Set is its easy installation process. Featuring a bolt-on design, the pads can be installed quickly without the need for specialized brake pad tools or professional assistance. This user-friendly installation saves time and effort, allowing you to get back on the road faster while maintaining the highest standards of safety. The package also includes necessary accessories to facilitate a smooth installation, ensuring that you have everything you need right out of the box.

When it comes to choosing the best brake pad brand, this Disc Brake Pad Set stands out for its superior materials and thoughtful engineering. The friction material is carefully formulated to provide a perfect balance between durability and performance, reducing wear on both the pads and the rotors. This not only extends the lifespan of your braking system but also helps maintain a quieter and smoother braking experience. The brake pads are designed to resist fading and offer consistent stopping power, even under demanding conditions such as high-speed driving or heavy loads.

The package contents include 4 brake pads, providing a complete set for a full axle replacement. This comprehensive set ensures that both sides of your vehicle receive equal attention, promoting balanced braking and improved vehicle control. Whether you're replacing worn-out pads or upgrading to a higher-quality product, this set offers excellent value and peace of mind.

In addition to their performance benefits, these brake pads are also designed with safety in mind. The precise fit and bolt-on installation reduce the risk of improper mounting, which can compromise braking efficiency. With the included accessories, you can be confident that every component is optimized to work together seamlessly. This attention to detail is why many consider this product from the best brake pad brand to be a top choice among automotive enthusiasts and everyday drivers alike.

Moreover, for those who prefer to handle brake maintenance themselves, the easy installation and included accessories eliminate the need for additional brake pad tools. This makes the Disc Brake Pad Set not only a high-performance solution but also a practical and convenient one. Whether you are a seasoned mechanic or a DIY enthusiast, you will appreciate the straightforward installation and reliable results.

In summary, this Disc Brake Pad Set combines excellent stopping power, durability, and ease of installation to provide a premium braking solution. With a friction coefficient of 0.35, bolt-on design, included accessories, and a package of 4 brake pads, it delivers everything you need for a safe and efficient braking upgrade. Trusted as part of the best brake pad brand, this set is an excellent investment for anyone looking to enhance their vehicle's braking performance without compromising on quality or convenience.

Features:

- Product Name: Disc Brake Pad Set (DBPS)
- Suitable for Front and Rear placement
- Compatible with Disc Brakes
- Provides Excellent Stopping Power for enhanced safety
- Includes all necessary Accessories for easy installation
- Manufactured as OEM brake pads ensuring high quality and reliability
- Recognized as the best brake pad brand in the market
- OEM brake pads designed for optimal performance and durability

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, is a premium choice for drivers seeking reliable and high-performance braking solutions. Originating from China, this set weighs approximately 1.2 kg per set, making it a robust yet manageable upgrade for various vehicle types. Designed to be installed on both the front and rear placements of your vehicle, these ceramic brake pads ensure comprehensive coverage and enhanced safety during your drives.

One of the standout features of the Herito ceramic brake pad set is its excellent stopping power. Whether you are navigating busy city streets or cruising on the highway, these brake pads provide consistent and responsive braking performance, giving you confidence and control at every turn. The ceramic material used in this set is not only effective but also contributes to quieter braking and less dust buildup compared to traditional brake pads, making maintenance easier and extending the life of your braking system.

Heat resistance is another critical attribute of the Herito ZK-38001 brake pads. Capable of withstanding temperatures up to 650°F (343°C), these pads are ideal for demanding driving conditions, including stop-and-go traffic, steep descents, and performance driving scenarios. This heat resistance ensures that the pads maintain their integrity and braking efficiency even under intense stress, reducing the risk of brake fade and enhancing overall safety.

These ceramic brake pads are perfectly suited for a variety of application occasions and scenarios. For daily commuters, they provide dependable stopping power for the start-and-stop nature of urban driving. For weekend adventurers and road trip enthusiasts, Herito brake pads offer the durability and performance needed for long-distance travel and varied terrains. Additionally, drivers participating in light performance or sporty driving will appreciate the balance of strong braking force and heat resistance.

As the best brake pad brand in its class, Herito combines quality materials with expert engineering to deliver a product that meets the highest standards. Whether you are replacing worn-out pads or upgrading your vehicle's braking system, the Herito ceramic brake pad set ZK-38001 is an excellent investment for safety, comfort, and performance. Its versatility for front and rear vehicle placements makes it an ideal choice for a wide range of cars, SUVs, and light trucks, ensuring optimal brake performance wherever you go.

Customization:

Herito offers product customization services for the Disc Brake Pad Set, model number ZK-38001, proudly made in China. Each package contains 4 brake pads, weighing approximately 1.2 kg per set. These brake pads are designed with high heat resistance, capable of withstanding temperatures up to 650°F (343°C), making them an excellent choice for those seeking the best ceramic brake pads on the

market. Herito ensures that their brake pads are not only heat resistant but also easy to install with a convenient bolt-on design. As one of the best brake pad brands, Herito provides good ceramic brake pads that deliver reliable performance and durability tailored to your specific needs.

Support and Services:

Our Disc Brake Pad Set is designed to deliver superior stopping power and long-lasting performance for a wide range of vehicles. To ensure optimal functionality and safety, please follow the installation instructions carefully and use compatible components.

If you experience any issues with the brake pads, such as unusual noise, reduced braking efficiency, or uneven wear, please inspect the pads and the entire braking system promptly. Regular maintenance and timely replacement of worn components are essential to maintain vehicle safety.

For best results, always break in your new brake pads according to the recommended bedding-in procedure to achieve maximum friction and durability. Avoid aggressive braking during the initial period to allow the pads and rotors to properly mate.

In case of any technical questions or concerns regarding our Disc Brake Pad Set, refer to the product manual or visit our website for detailed support resources, including FAQs, troubleshooting guides, and instructional videos.

We are committed to providing high-quality products and excellent customer service to ensure your complete satisfaction and safety on the road.
