

Heat Resistant ceramic brake pads built to meet standard criteria delivering stopping power and resistance to wear under extreme conditions

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Wearresistance: High Wear Resistance
- Corrosion Resistance: Yes, Coated Backing Plate
- Size: Standard
- Package Quantity: 1 Set
- Slotted: Yes
- Noiselevel: Low Noise
- Guarantee Peroid: 30000-50000km
- Fmsi: D1566

Product Description:

The Disc Brake Pad Set, identified by FMSI number D1566, is an essential component designed to provide reliable and efficient braking performance for your vehicle. Engineered to meet or exceed OEM brake pads standards, this set ensures superior stopping power and durability, making it an excellent choice for those seeking both safety and quality in their braking system.

One of the standout features of this Disc Brake Pad Set is its exceptional heat resistance. During intense braking situations, excessive heat can cause brake pads to fade or wear prematurely. These pads are specifically formulated with advanced materials that allow them to withstand high temperatures, ensuring consistent braking performance even under the most demanding driving conditions. This heat-resistant quality not only extends the lifespan of the pads but also enhances overall vehicle safety by maintaining reliable stopping power. The set includes four brake pads, providing a complete solution for replacing the brake pads on both sides of a single axle. This comprehensive packaging means you have everything you need to perform a full brake pad replacement, ensuring balanced braking and optimal performance across both wheels. Additionally, the inclusion of all necessary hardware in the package simplifies installation, saving you time and effort. Whether you are a professional mechanic or a DIY enthusiast, having the hardware included removes the hassle of sourcing separate components and guarantees a proper fit.

With a guaranteed service lifespan ranging from 30,000 to 50,000 kilometers, these brake pads offer long-lasting performance, reducing the frequency of replacements and maintenance costs. This durability is a testament to the high-quality materials and precise manufacturing processes used in producing these pads. Investing in this Disc Brake Pad Set means you can count on dependable braking over an extended period, providing peace of mind during your daily commutes or long road trips.

These brake pads are considered among the best ceramic brake pads available on the market today. Ceramic brake pads are known for their quieter operation, reduced brake dust production, and superior performance compared to traditional metallic pads. Their smooth and consistent braking response enhances driving comfort and safety. Moreover, ceramic pads tend to be gentler on rotors, helping to prolong the life of your entire braking system.

For those planning to install or replace these brake pads, having the right brake pad tool is crucial for a smooth and safe installation process. Using a proper brake pad tool ensures that the pads are correctly positioned and secured, preventing any potential issues such as uneven wear or brake noise. Whether you are using a professional-grade brake pad tool or a reliable DIY kit, combining it with this top-quality Disc Brake Pad Set will result in a seamless installation and optimal braking performance.

In summary, the Disc Brake Pad Set with FMSI D1566 is a premium choice for anyone looking to upgrade their vehicle's braking system with OEM brake pads that offer outstanding durability, heat resistance, and performance. Its inclusion of all necessary hardware and four pads per set makes it a convenient and cost-effective solution. Coupled with the use of a proper brake pad tool during installation, this set guarantees a reliable and efficient braking experience that you can trust for many kilometers to come. Choose these best ceramic brake pads to enhance your vehicle's safety, comfort, and longevity on the road.

Features:

- Product Name: Disc Brake Pad Set
- Brake Pad Type: Disc
- Product Placement: Front and Rear
- Guarantee Period: 30,000 - 50,000 km
- Hardware Included: Yes
- Number of Pads: 4
- High-quality ceramic brake pads for superior performance
- OEM brake pads ensuring perfect fit and reliability
- Considered one of the best ceramic brake pads on the market

Technical Parameters:

Noise Level	Low Noise
Package Quantity	1 Set
Number of Pads	4
Brake Pad Type	Disc
Heat Resistant	Yes
Hardware Included	Yes
Wear Resistance	High Wear Resistance
Slotted	Yes
Corrosion Resistance	Yes, Coated Backing Plate
Size	Standard

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, is an essential component designed to offer superior braking performance for a variety of vehicles. Manufactured in China with high-quality materials, these brake pads are engineered to provide high wear resistance, ensuring long-lasting durability and reliable stopping power. The set includes 4 pads, suitable for both front and rear placement, making it

a versatile choice for comprehensive brake system maintenance.

Ideal for everyday driving as well as more demanding conditions, the Herito brake pads are crafted from the best ceramic brake pads material available in the market. This ensures not only enhanced braking efficiency but also reduced noise and minimal dust generation, contributing to a cleaner and quieter driving experience. Whether you are navigating busy city streets or tackling winding mountain roads, these pads deliver consistent performance and safety.

The standard size of the Herito Disc Brake Pad Set makes it compatible with a wide range of vehicles, simplifying the replacement process. Additionally, these pads correspond with interchange part numbers D1293 and D1222, providing ease of identification and compatibility with other brake systems. This makes the Herito ZK-38001 brake pads a convenient and reliable choice for vehicle owners seeking the best brake pad material to upgrade or replace their existing brake components.

In various application scenarios, such as daily commuting, weekend road trips, or even light off-road adventures, the Herito brake pads stand out as the best ceramic brake pads option due to their excellent wear resistance and efficient braking capabilities. Their robust construction and high-quality ceramic compound ensure safety and performance in both front and rear brake placements, catering to diverse driving needs and conditions.

Whether you are a professional mechanic, an automotive enthusiast, or an everyday driver, the Herito Disc Brake Pad Set ZK-38001 offers the perfect balance of performance, durability, and compatibility. Trust these brake pads to deliver optimal stopping power and enhanced safety for your vehicle, making them a top choice in the category of best ceramic brake pads and the best brake pad material available today.
