

Standard Disc Brake Pad Set Featuring Number Of Pads 4 and Corrosion Resistance Coated Backing Plate for Vehicle Braking

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Interchange Part Number: D1293 D1222
- Slotted: Yes
- Noiselevel: Low Noise
- Corrosion Resistance: Yes, Coated Backing Plate
- Product Placement: Front And Rear
- Size: Standard
- Brake Pad Type: Disc
- Hardware Included: Yes

Product Description:

Introducing our premium Disc Brake Pad Set, expertly designed to deliver superior braking performance for both the front and rear of your vehicle. This comprehensive set includes 4 high-quality brake pads, providing you with everything needed to ensure optimal stopping power and safety on the road. Whether you're performing routine maintenance or upgrading your braking system, this disc brake pad set is an ideal choice for drivers who demand reliability and durability.

Our disc brake pads are engineered with advanced materials that meet or exceed OEM brake pads standards, ensuring a perfect fit and seamless integration with your vehicle's braking system. These ceramic brake pads are specifically formulated to offer excellent friction characteristics while minimizing noise and dust, resulting in a cleaner, quieter driving experience. The ceramic compound also contributes to enhanced wear resistance, helping to extend the lifespan of your brake pads and reduce the frequency of replacements.

One of the standout features of this brake pad set is its remarkable heat resistance. During heavy braking or prolonged use, excessive heat can lead to brake fade, compromising your vehicle's stopping capability. Our heat-resistant ceramic brake pads are designed to withstand high temperatures, maintaining consistent performance even under demanding conditions. This ensures that you have reliable braking power when you need it most, whether navigating busy city streets or tackling steep downhill descents.

The package quantity includes one complete set of front and rear disc brake pads, totaling four pads. This allows you to service your vehicle's entire braking system at once, ensuring balanced and even braking performance across all wheels. Replacing both front and rear pads simultaneously helps maintain vehicle stability and control, enhancing overall safety for you and your passengers.

Installation is straightforward, thanks to the precise manufacturing and adherence to OEM specifications. These brake pads are designed to fit a wide range of vehicles, making them a versatile option for many drivers. Whether your vehicle originally came equipped with ceramic brake pads or you are upgrading from standard pads, this set offers a smooth and effective braking solution.

In addition to performance and safety, these ceramic disc brake pads contribute to environmental benefits by producing less brake dust compared to traditional semi-metallic pads. Less brake dust means cleaner wheels and reduced contamination of surrounding brake components, which can prolong the life of your entire braking system. This makes our disc brake pad set not only a practical choice but also an environmentally conscious one.

In summary, this Disc Brake Pad Set provides a high-quality, reliable, and durable braking solution for your vehicle's front and rear wheels. Featuring 4 heat-resistant ceramic brake pads that meet OEM brake pads standards, this set ensures enhanced stopping power, reduced noise, and minimal brake dust. With easy installation and a complete package quantity, it's the perfect upgrade or replacement choice to keep your vehicle performing safely and efficiently under all driving conditions.

Features:

Product Name: Disc Brake Pad Set -----

Placement: Suitable for Front and Rear wheels

Guarantee Period: 30,000 - 50,000 km

Size: Standard

Heat Resistant: Yes, designed to withstand high temperatures

Brake Pad Type: Disc

Material: High-quality ceramic brake pad for enhanced performance

Durability: Long-lasting ceramic brake pad ensuring reliable braking

Brand Reputation: Considered one of the best brake pad brands in the market

Technical Parameters:

Wear Resistance	High Wear Resistance
Package Quantity	1 Set
Heat Resistant	Yes
Hardware Included	Yes
Noise Level	Low Noise
Brake Pad Type	Disc
Size	Standard
Product Placement	Front And Rear
Corrosion Resistance	Yes, Coated Backing Plate
FMSI	D1566

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, is an excellent choice for drivers seeking reliable and efficient braking performance. Manufactured in China, these good ceramic brake pads are designed to meet the rigorous demands of everyday driving as well as more challenging conditions. With a guarantee period covering 30,000 to 50,000 kilometers, this product offers long-lasting durability and peace of mind for vehicle owners.

These disc brake pads are perfect for a wide range of application occasions and scenarios. Whether you are commuting through busy city streets, taking long highway trips, or navigating winding mountain roads, the Herito ZK-38001 brake pads provide consistent stopping

power and safety. Their excellent heat dissipation capabilities ensure that the braking system remains cool even during heavy use, reducing the risk of brake fade and maintaining optimal performance.

For drivers who require dependable braking in both everyday and demanding environments, these good ceramic brake pads stand out. The corrosion-resistant, coated backing plate adds an extra layer of protection, ensuring that the brake pads maintain their integrity and effectiveness even in wet or salty conditions. This makes them ideal for regions with harsh weather or frequent rain, where corrosion can be a significant issue.

The inclusion of all necessary hardware in the package simplifies the installation process, allowing mechanics and DIY enthusiasts alike to replace brake pads quickly and efficiently. This feature makes the Herito Disc Brake Pad Set a practical option for garages, repair shops, and individual vehicle owners looking to upgrade or maintain their braking system with high-quality components.

In summary, the Herito ZK-38001 good ceramic brake pads are suitable for a variety of vehicles and driving styles. Their excellent heat dissipation, corrosion resistance, and long guarantee period make them a reliable choice for safety-conscious drivers. Whether for daily commuting, spirited driving, or even light off-road use, these disc brake pads deliver consistent and trustworthy performance, ensuring your vehicle's braking system operates at its best.
