

Slotted Disc Brake Pad Set High Wear Resistance Interchange Part Number D1293 D1222 Optimized for Extended Service Life

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Heat Resistant: Yes
- Noiselevel: Low Noise
- Interchange Part Number: D1293 D1222
- Brake Pad Type: Disc
- Size: Standard
- Number Of Pads: 4
- Product Placement: Front And Rear
- Corrosion Resistance: Yes, Coated Backing Plate

Product Description:

The Disc Brake Pad Set is engineered to deliver superior braking performance, combining advanced materials and innovative design to meet the demands of modern vehicles. These brake pads are recognized for their excellent heat dissipation capabilities, ensuring consistent and reliable stopping power even under the most strenuous driving conditions. Whether you are navigating city traffic or tackling steep descents, the heat-resistant properties of these pads minimize brake fade, enhancing safety and control.

One of the standout features of this Disc Brake Pad Set is its ability to maintain a low noise level during operation. Unlike many conventional brake pads that can produce squealing or grinding sounds, these pads are designed to operate quietly, contributing to a more comfortable and pleasant driving experience. This low noise feature is especially important for drivers who prioritize a smooth and noise-free ride without compromising braking efficiency.

Constructed to meet the FMSI standard D1566, this brake pad set ensures compatibility with a wide range of vehicle models. This makes it an excellent choice for those seeking OEM brake pads that match or exceed the quality and specifications of original manufacturer components. The adherence to FMSI standards guarantees a precise fit and reliable performance, making installation straightforward and hassle-free.

Corrosion resistance is another critical aspect of this Disc Brake Pad Set. The backing plates come with a special coating that protects against rust and corrosion, significantly extending the lifespan of the brake pads. This protective coating also helps maintain the structural integrity of the pads under harsh environmental conditions, including exposure to moisture, road salts, and other corrosive elements. As a result, these brake pads not only perform well but also offer long-term durability and reliability.

For drivers seeking good ceramic brake pads, this Disc Brake Pad Set represents an ideal solution. Ceramic brake pads are known for their excellent performance, clean operation, and longevity. This set embodies all these qualities, making it one of the best ceramic brake pads available on the market today. The ceramic material contributes to reduced dust generation, meaning your wheels stay cleaner compared to traditional brake pads.

Moreover, these brake pads provide an excellent balance between performance and comfort. The ceramic composition allows for effective heat management, which reduces wear and tear on the brake system. This not only helps in maintaining consistent brake response but also prolongs the life of your rotors. Drivers will appreciate the smooth and predictable braking feel delivered by this set, which is a hallmark of high-quality ceramic brake pads.

Choosing this Disc Brake Pad Set means investing in safety, performance, and peace of mind. The combination of excellent heat dissipation, heat resistance, low noise operation, corrosion-resistant coated backing plates, and compliance with FMSI D1566 standards ensures you receive a product that excels in every critical aspect of braking. Whether you're replacing worn-out pads or upgrading your braking system, these pads stand out as the best ceramic brake pads that meet OEM quality standards.

In conclusion, if you are looking for brake pads that offer superior heat management, quiet operation, and durability, this Disc Brake Pad Set is an outstanding choice. It provides all the benefits of good ceramic brake pads with the assurance of OEM brake pads quality. Experience enhanced braking performance and longevity with this expertly crafted brake pad set designed to keep you safe and in control on every journey.

Features:

- Product Name: Disc Brake Pad Set -----
- Brake Pad Type: Disc
- Heat Resistant: Yes
- Heat Dissipation: Excellent Heat Dissipation for optimal performance
- Interchange Part Number: D1293, D1222
- Corrosion Resistance: Yes, with Coated Backing Plate
- Made from the best brake pad material to ensure durability and safety
- Features good ceramic brake pads for quieter and smoother braking
- Premium quality ceramic brake pads designed for long-lasting performance

Technical Parameters:

Slotted	Yes
Corrosion Resistance	Yes, Coated Backing Plate
Heat Resistant	Yes
FMSI	D1566
Hardware Included	Yes
Number Of Pads	4
Guarantee Period	30000-50000 km
Package Quantity	1 Set
Product Placement	Front And Rear
Noise Level	Low Noise

These best ceramic brake pads offer superior performance with excellent corrosion resistance and heat resistance, making them some of the best ceramic brake pads available. Their low noise level and inclusion of hardware ensure a smooth installation and quiet operation, embodying the qualities expected from premium ceramic brake pads.

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, originating from China, is designed to meet the highest standards of performance and durability. Known as one of the best brake pad brands in the market, Herito offers a product that excels in various application occasions and scenarios, making it an ideal choice for a wide range of vehicles and driving conditions.

This brake pad set is perfect for daily commuting, long-distance travel, and even performance driving. Its low noise feature ensures a quiet and comfortable ride, making it suitable for urban environments where noise pollution is a concern. Whether you are driving through busy city streets or cruising on highways, the Herito brake pads deliver a smooth and noise-free braking experience.

For enthusiasts and professional drivers who demand high performance, the Herito ZK-38001 brake pads provide excellent heat dissipation, which is crucial during aggressive braking or high-speed driving. This feature helps prevent brake fade and maintains consistent braking power, enhancing safety and control. Additionally, the high wear resistance of these pads ensures long-lasting performance, reducing the frequency of replacements and maintenance costs.

The corrosion resistance provided by the coated backing plate makes this brake pad set ideal for use in various weather conditions, including wet and salty environments. This durability ensures reliable braking performance even in harsh climates, making it suitable for regions with heavy rainfall or winter driving conditions.

When paired with the right brake pad tool, installation of the Herito disc brake pad set is straightforward and efficient. This makes it a favorite among DIY mechanics and professional technicians alike. Whether you are upgrading your vehicle's braking system or performing routine maintenance, these pads provide a hassle-free experience.

Herito's ZK-38001 is also recognized as one of the best ceramic brake pads available, offering superior stopping power with minimal dust and less wear on the rotors. This combination of features makes it an excellent choice for drivers seeking reliable, high-quality brake pads that enhance safety and performance in a variety of driving scenarios.

In summary, the Herito Disc Brake Pad Set is suitable for everyday driving, performance applications, and harsh environmental conditions. Its low noise, high wear resistance, corrosion-resistant coated backing plate, and excellent heat dissipation make it a versatile and dependable brake solution. With a package quantity of one set, it provides everything needed to upgrade your vehicle's braking system with confidence and ease.
