

Low Noise best ceramic brake pads with hardware included engineered to reduce wear and provide smooth stopping experience

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Corrosion Resistance: Yes, Coated Backing Plate
- Package Quantity: 1 Set
- Brake Pad Type: Disc
- Interchange Part Number: D1293 D1222
- Wearresistance: High Wear Resistance
- Product Placement: Front And Rear
- Heat Dissipation: Excellent Heat Dissipation
- Number Of Pads: 4

Product Description:

Introducing our premium Disc Brake Pad Set, meticulously engineered to deliver outstanding performance, durability, and safety for your vehicle. Designed with advanced materials and cutting-edge technology, these brake pads provide an exceptional braking experience that meets the demands of both daily driving and more rigorous conditions.

One of the standout features of this Disc Brake Pad Set is its high wear resistance. Constructed from superior ceramic compounds, these pads are built to last, ensuring that you get the most mileage out of your investment. The high wear resistance significantly reduces the frequency of replacements, saving you both time and money in the long run. Whether you are commuting in stop-and-go traffic or tackling winding roads, these brake pads maintain their integrity and performance throughout their lifespan.

Another critical attribute is the excellent heat dissipation capability of this brake pad set. During braking, friction generates heat, which can degrade pad performance and cause brake fade. Our Disc Brake Pads are designed with slotted surfaces that enhance airflow and promote rapid heat dispersion. This design helps maintain optimal braking efficiency even under heavy use, providing you with consistent stopping power and improved safety. The combination of slotted design and advanced ceramic materials ensures that heat buildup is minimized, protecting both the pads and your brake rotors from excessive wear.

Included with the Disc Brake Pad Set is all necessary hardware, making installation straightforward and hassle-free. The hardware kit ensures that each pad is securely fitted and operates smoothly, which is essential for maintaining proper brake function. This comprehensive inclusion means you won't need to purchase additional parts separately, providing convenience and ensuring compatibility with your vehicle's braking system.

When it comes to reliability, our Disc Brake Pad Set comes with an impressive guarantee period covering 30,000 to 50,000 kilometers. This warranty reflects the confidence in the product's durability and performance. Knowing that your brake pads are covered for such an extensive distance gives you peace of mind and underscores the high quality of these components.

For those seeking the best ceramic brake pads on the market, this Disc Brake Pad Set is an outstanding choice. The combination of high wear resistance, excellent heat dissipation, and thoughtful design features makes these pads stand out from the competition. They deliver smooth, quiet braking performance with minimal dust generation, which helps keep your wheels clean and your driving experience comfortable.

In summary, our Disc Brake Pad Set offers a perfect balance of safety, durability, and efficiency. Whether you prioritize long-lasting wear, superior heat management, or ease of installation, these brake pads deliver on all fronts. With the added assurance of included hardware and a comprehensive guarantee period, you are investing in a product that will serve your vehicle well for tens of thousands of kilometers. For drivers who demand the best, these are truly the best ceramic brake pads available, providing unmatched performance and reliability for your braking needs.

Features:

- Product Name: Disc Brake Pad Set
- FMSI Number: D1566
- Number of Pads: 4
- Guarantee Period: 30,000-50,000 km
- Brake Pad Type: Disc
- Package Quantity: 1 Set
- Made from the best brake pad material for enhanced durability and performance
- Includes the best ceramic brake pads for quiet braking and reduced dust
- High-quality ceramic brake pad ensures reliable stopping power and long-lasting use

Technical Parameters:

Package Quantity	1 Set
Noise Level	Low Noise
Hardware Included	Yes
Heat Resistant	Yes
Product Placement	Front And Rear
Brake Pad Type	Disc
Size	Standard
FMSI	D1566
Corrosion Resistance	Yes, Coated Backing Plate
Interchange Part Number	D1293, D1222

These OEM brake pads are designed to provide superior performance and durability. As some of the best ceramic brake pads available, they ensure low noise and excellent heat resistance, making them an ideal choice for your vehicle's front and rear disc brake systems.

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, is designed to meet the highest standards of performance and durability. Manufactured in China, these brake pads are engineered with high wear resistance materials to ensure long-lasting functionality, making

them an ideal choice for drivers seeking reliability and safety on the road. With a guaranteed service period ranging from 30,000 to 50,000 kilometers, these pads offer excellent value and consistent braking performance throughout their lifespan.

One of the standout features of the Herito ZK-38001 brake pads is their corrosion resistance, achieved through a specially coated backing plate. This coating prevents rust and deterioration, ensuring that the brake pads maintain their structural integrity even in harsh weather conditions. This makes them particularly suitable for drivers in regions with heavy rain, snow, or salty road treatments, where corrosion can significantly impact brake component longevity.

These disc brake pads utilize the best brake pad material available in the market, combining durability with superior stopping power. As some of the best ceramic brake pads, they provide quieter braking, reduced dust emission, and improved heat dissipation compared to traditional semi-metallic pads. This results in a smoother driving experience and less maintenance of the brake system. For those who prefer working on their vehicles themselves, the Herito brake pad set is compatible with standard brake pad tools, making installation and replacement straightforward and hassle-free.

The Herito ZK-38001 with FMSI number D1566 is versatile and suitable for a wide range of vehicles that require disc brake pads of this specification. It is an excellent choice for everyday commuting, long-distance travel, and even more demanding driving scenarios such as mountainous terrain or heavy traffic. Whether you are a professional mechanic or a DIY enthusiast, this brake pad set offers the perfect balance of performance, safety, and longevity.

In summary, the Herito Disc Brake Pad Set is a premium product that combines high wear resistance, corrosion protection, and the best ceramic brake pad technology to deliver reliable braking performance. Its compatibility with brake pad tools and long guarantee period make it a practical and trusted solution for maintaining your vehicle's braking system effectively.
