

Hardware Included Yes good ceramic brake pads standard optimized for smooth pedal feel and reduced brake fade under load

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Fmsi: D1566
- Corrosion Resistance: Yes, Coated Backing Plate
- Product Placement: Front And Rear
- Noiselevel: Low Noise
- Slotted: Yes
- Guarantee Peroid: 30000-50000km
- Interchange Part Number: D1293 D1222
- Hardware Included: Yes

Product Description

Product Description:

The Disc Brake Pad Set is engineered to provide superior braking performance and durability for a wide range of vehicles. Designed to fit both front and rear placements, these disc brake pads deliver consistent, reliable stopping power whether you are driving in the city or on the highway. Crafted from the best brake pad material, this set ensures optimal friction and heat dissipation, which translates to enhanced safety and a smoother driving experience.

One of the standout features of this disc brake pad set is its high wear resistance. The pads are meticulously designed to withstand the rigors of daily driving, offering a long service life with minimal degradation. This wear resistance not only extends the lifespan of the brake pads but also helps maintain effective braking performance over time, reducing the need for frequent replacements and saving you money in the long run.

These OEM brake pads meet or exceed the stringent standards set by vehicle manufacturers, ensuring a perfect fit and reliable operation. By using genuine quality materials and advanced manufacturing processes, the disc brake pads provide a seamless integration with your vehicle's braking system. This assures drivers that they are installing components that are specifically tailored for their vehicle, maintaining the integrity and safety of the original design.

The product comes with a guarantee period ranging from 30,000 to 50,000 kilometers, reflecting the confidence in its durability and performance. This extended guarantee provides peace of mind to vehicle owners, knowing that their brake pads are covered during a significant portion of their vehicle's usage. Whether you are commuting daily or embarking on long road trips, these brake pads are built to perform consistently throughout their lifespan.

In addition to the brake pads themselves, the set includes all necessary hardware for installation. This means you receive a complete package with clips, shims, and other essential components required to ensure a secure and proper fit. Having all hardware included simplifies the installation process and ensures that the brake pads function as intended without any additional purchases or delays.

Choosing the right brake pad type is crucial for vehicle safety and performance. These disc brake pads are specifically designed for disc brake systems, which are known for their superior stopping power and heat management compared to drum brakes. By opting for this disc brake pad set, you are investing in a product that enhances braking efficiency, reduces brake fade, and improves overall control during braking maneuvers.

Whether you are replacing worn-out pads or upgrading your braking system, this Disc Brake Pad Set stands out as an excellent choice. It combines the reliability of OEM brake pads with the advantages of high-quality materials and comprehensive hardware inclusion. The high wear resistance ensures long-lasting performance, while the significant guarantee period underscores the product's durability.

In summary, this Disc Brake Pad Set offers a perfect blend of safety, performance, and value. It is designed to meet the demands of modern driving by providing effective braking in both front and rear placements. With the best brake pad material used in its construction, these disc brake pads deliver exceptional wear resistance and consistent stopping power. The inclusion of all necessary hardware makes installation straightforward and hassle-free, and the generous guarantee period provides confidence in the product's longevity. Upgrade your vehicle's braking system with this reliable and high-performance disc brake pad set to enjoy safer and more comfortable drives every time you hit the road.

Features:

Product Name: Disc Brake Pad Set

Brake Pad Type: Disc

Slotted design for improved heat dissipation and performance

FMSI Number: D1566

Package Quantity: 1 Set

Low noise level for a quiet braking experience

Made from good ceramic brake pads material for durability and effectiveness

High-quality ceramic brake pads ensuring reliable stopping power

Optimized disc brake pads for enhanced safety and control

Technical Parameters:

Brake Pad Type	Disc
Slotted	Yes
Interchange Part Number	D1293, D1222
Wear Resistance	High Wear Resistance
Size	Standard
Guarantee Period	30000-50000 km
Corrosion Resistance	Yes, Coated Backing Plate
Heat Dissipation	Excellent Heat Dissipation
FMSI	D1566
Number Of Pads	4

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, originating from China, is designed to deliver exceptional performance in a variety of application occasions and scenarios. As one of the best ceramic brake pads available on the market, these disc brake pads provide reliable stopping power with low noise, making them ideal for both everyday driving and demanding conditions.

In urban environments, the Herito disc brake pads are perfect for city commuting. Their low noise feature ensures a quiet and comfortable ride through busy streets, while the excellent heat dissipation characteristic helps maintain optimal braking performance during stop-and-go traffic. The standard size and slotted design contribute to efficient heat and gas release, reducing brake fade and extending the lifespan of the pads, which is crucial for frequent short trips.

For highway driving and long-distance travel, these brake pads offer dependable braking stability and enhanced safety. The best brake pad material used in the Herito ZK-38001 model provides consistent friction levels even under high-speed conditions, ensuring smooth and controlled deceleration. The slotted feature additionally helps to manage heat buildup during prolonged braking, preventing overheating and maintaining consistent performance throughout the journey.

In more demanding scenarios, such as mountainous terrain or heavy-load driving, the Herito disc brake pads excel due to their excellent heat dissipation capabilities. This attribute allows the pads to handle intense braking without compromising effectiveness, making them suitable for SUVs, light trucks, and vehicles frequently used for towing. The durability and resilience of these pads make them a top choice for drivers who require reliable and high-quality braking components.

Overall, the Herito Disc Brake Pad Set (FMSI: D1566) stands out as a versatile and high-performance option. Whether for daily urban travel, long highway cruises, or challenging driving conditions, these disc brake pads offer the best ceramic brake pads technology combined with superior materials and engineering. Choosing Herito ensures enhanced safety, reduced noise, and long-lasting brake performance in various driving scenarios.
