

Slotted brake pad tool engineered for front and rear brake pad replacement supporting effective brake system maintenance

Our Product Introduction

for more products please visit us on heritobrake.com

Basic Information

- Brand Name: Herito
- Model Number: ZK-38001

Product Specification

- Hardware Included: Yes
- Size: Standard
- Noiselevel: Low Noise
- Package Quantity: 1 Set
- Heat Resistant: Yes
- Product Placement: Front And Rear
- Fmsi: D1566
- Number Of Pads: 4

Product Description:

The Disc Brake Pad Set is an essential component designed to deliver superior braking performance and safety for a wide range of vehicles. Manufactured to standard size specifications, this set ensures a perfect fit for compatible disc brake systems, making installation straightforward and hassle-free. Whether you're performing routine maintenance or an upgrade, these brake pads offer reliable stopping power that drivers can trust.

One of the standout features of this Disc Brake Pad Set is its exceptional heat resistance. Brake pads are subjected to intense friction and high temperatures during braking, and having heat-resistant materials is crucial for maintaining consistent performance. These pads are engineered to withstand extreme heat without degrading, which helps prevent brake fade and maintains stopping efficiency even during prolonged or heavy braking situations.

In addition to heat resistance, the pads boast excellent heat dissipation properties. Effective heat dissipation is vital to avoid overheating, which can lead to premature wear and reduced braking capability. The advanced design and material composition of these pads facilitate rapid heat dispersion, ensuring that the brake system remains cool and responsive. This feature not only enhances safety but also extends the lifespan of both the pads and the braking components they work with.

These brake pads come in a set of four, providing all the components needed for a complete brake job on both wheels of an axle. This all-inclusive package allows for balanced braking performance and ensures that your vehicle maintains optimal handling and control. The pads are designed to be compatible with interchange part numbers D1293 and D1222, making them a versatile choice for various vehicle makes and models that specify these part numbers.

When it comes to brake pad material, ceramic is widely recognized as one of the best options available, and this Disc Brake Pad Set utilizes the best ceramic brake pads technology. Ceramic brake pads are favored for their quiet operation, minimal dust production, and consistent performance under diverse driving conditions. They provide a smoother braking experience compared to traditional metallic or organic pads, reducing noise and vibration for a more comfortable ride.

Moreover, ceramic brake pads are known for their longevity and resistance to wear, making them an economical choice over time. They maintain their integrity better under stress and offer excellent performance in both wet and dry conditions. By choosing this Disc Brake Pad Set, you are investing in the best brake pad material that combines safety, durability, and performance.

In summary, the Disc Brake Pad Set is a high-quality, standard-sized brake pad solution that excels in heat resistance and heat dissipation. Its compatibility with interchange part numbers D1293 and D1222 ensures it fits a variety of vehicles, while the set of four pads covers complete axle replacement needs. Utilizing the best ceramic brake pads technology, this set offers quiet, clean, and reliable braking performance. If you are seeking brake pads that provide safety, durability, and superior stopping power, these ceramic brake pads represent an excellent choice for your vehicle's braking system.

Features:

- Product Name: Disc Brake Pad Set
- Heat Resistant: Yes, ensuring durability and performance under high temperatures
- Package Quantity: 1 Set, containing all necessary components for installation
- Product Placement: Suitable for both Front and Rear brakes
- FMSI Number: D1566 for easy reference and compatibility
- Hardware Included: Yes, includes all required hardware for a complete installation
- Made from the best brake pad material for optimal stopping power and longevity
- Good ceramic brake pads that offer reduced noise and minimal dust
- High-quality ceramic brake pad design for improved braking performance and safety

Technical Parameters:

Wear Resistance	High Wear Resistance
Size	Standard
Interchange Part Number	D1293, D1222
Corrosion Resistance	Yes, Coated Backing Plate
Brake Pad Type	Disc
Heat Resistant	Yes
Slotted	Yes
Guarantee Period	30000-50000 km
FMSI	D1566
Package Quantity	1 Set

Our OEM brake pads are engineered as the best ceramic brake pads to provide superior performance and durability. These disc brake pads ensure reliable stopping power and excellent wear resistance for a long-lasting braking experience.

Applications:

The Herito Disc Brake Pad Set, model number ZK-38001, is designed to deliver exceptional performance across a wide range of driving scenarios and applications. As a product originating from China, this set has quickly gained recognition as one of the best brake pad

brands in the automotive industry. Engineered with high wear resistance and excellent heat dissipation properties, these ceramic brake pads ensure reliable braking power, enhanced safety, and long-lasting durability. This brake pad set is ideal for everyday commuting, providing smooth and quiet stops in urban environments where frequent braking is required. Whether navigating through city traffic or stopping at busy intersections, the Herito ZK-38001 ensures consistent performance without compromising comfort. Its standard size fits most vehicles, making it a versatile choice for drivers seeking OEM brake pads that meet or exceed original equipment specifications.

For those who enjoy sportier driving or need reliable braking on winding roads and highways, the Herito Disc Brake Pad Set offers excellent heat dissipation to prevent brake fade during intense use. This makes it an excellent option for drivers who frequently tackle hilly terrains or require dependable stopping power on long downhill stretches. The high wear resistance also means less frequent replacements, reducing maintenance costs over time.

In addition to personal vehicles, this ceramic brake pad set is suitable for light commercial vehicles that demand robust braking performance under varying load conditions. Its compatibility with interchange part numbers D1293 and D1222 ensures easy replacement and compatibility with multiple vehicle models, further underscoring its practicality and reliability as OEM brake pads.

Whether you are replacing worn-out pads or upgrading your brake system, the Herito ZK-38001 Disc Brake Pad Set delivers superior stopping power, durability, and safety. Its combination of advanced ceramic materials and precision engineering makes it the preferred choice for drivers who value quality and performance in their braking components. Choose Herito for a trusted solution that stands out in the market of the best brake pad brands.
